2009 Best Team: Digital Goniometer

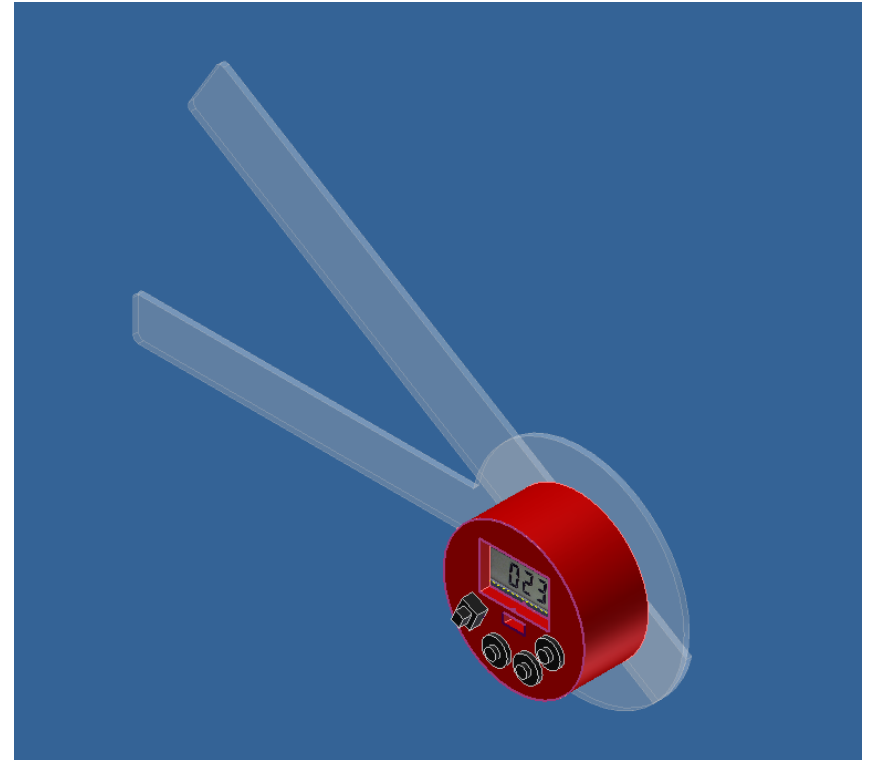

**Thomas Randall
Dustin Schaefer
Colby Thomas
Andrew Roskey**

Goniometer Applications?

- A Medical Device
- Measures the angle of joint movement on therapy patients to record progress.
- Allows an object to be rotated to a precise angular position.

Concept Sketches

Portable Wrapper

- Customer Needs Answered
 - Portable, Wire Wrapped, Wire Cutter
- Drawbacks or Challenges
 - Programming

Photocell Power

- Customer Needs Answered
 - Wire Wrapped on Coil
- Drawbacks or Challenges
 - Spool Position
 - Programming

Box Design

- Customer Needs Answered
 - Programmable, semi-portable, self-contained
- Challenges or Drawbacks
 - Sharp corners, bulky, unstable when not attached

Boxed Measuring Device

- Customer Needs Answered
 - Mechanical, Easy to use, simple layout
- Challenges or Drawbacks
 - Non Portable

Plasma Generator

What is a glow discharge chamber?

- Uses high voltage passed from an electrode to a grounded specimen
- Generates plasma on the grounded specimen
- Used to create non-thermal plasma by an electrical field
- Non-thermal plasma is much cheaper than thermal & more practical in manufacturing purposes

Concept Generation

Hand sketch (you may ignore unnecessary or obvious features)

Hand sketch (you may ignore unnecessary or obvious features)

Hand sketch (you may ignore unnecessary or obvious features)

Hand sketch (you may ignore unnecessary or obvious features)

Using weight of quartz, design & gravity an airtight seal would be created when you turn on vacuum

Hand sketch (you may ignore unnecessary or obvious features)

Final product and test

Shovel Adaptor

Kelly Kincaid
Zach Hanson
Slade Kusy
John Sparks

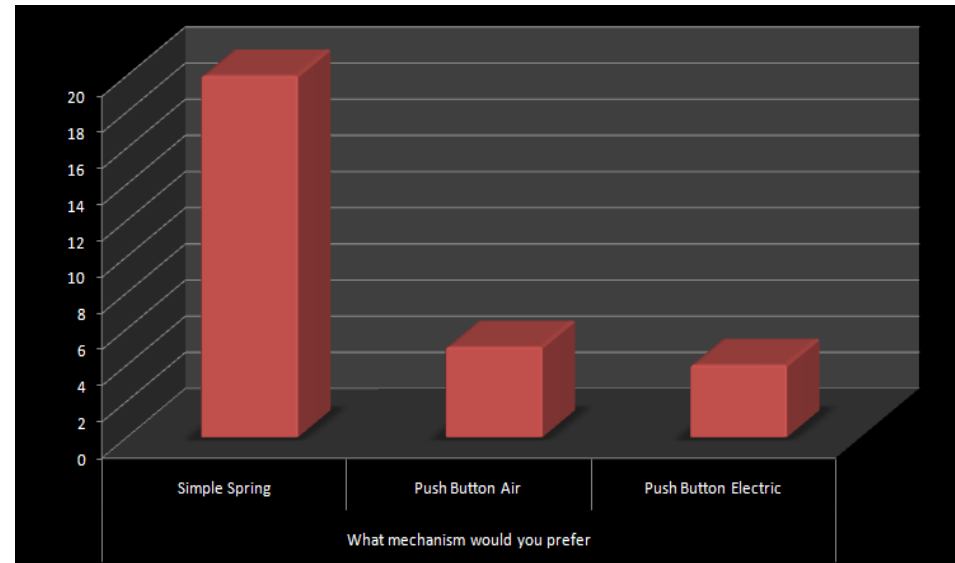

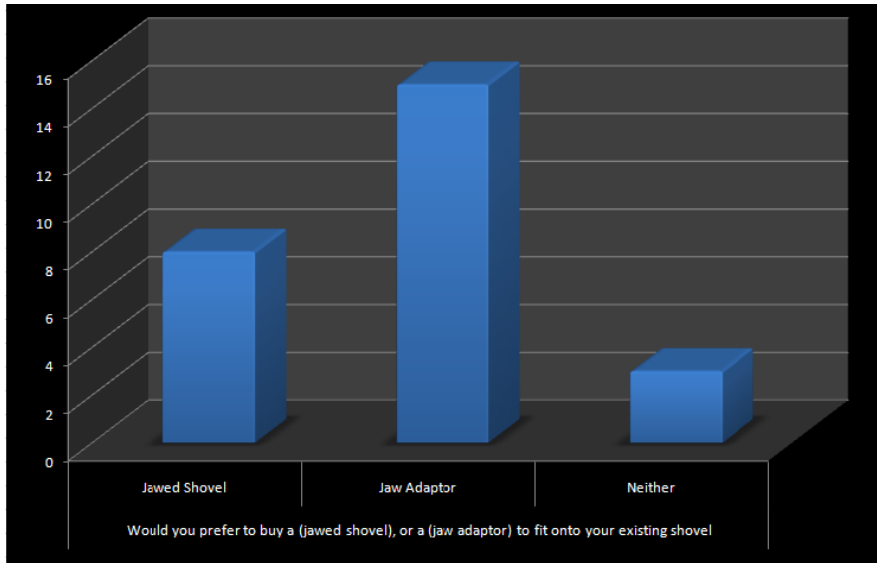

Sponsor and Problem

- Csar Ornelas
 - Contractor
- Problems with Debris Clean up
 - Lengthy process
 - By hand or with hand tools
 - Hand tools are difficult to handle the debris
- Desired Solution
 - A way to secure debris to a shovel in order to greatly decrease clean up time

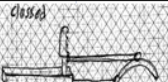

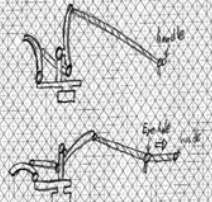

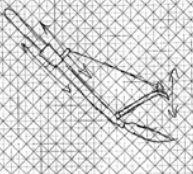

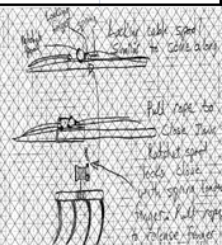

Survey Results

The survey has answered some of our design questions so that we are now able to start some simple sketches. We will be designing a universal adapter with a simple mechanism to fit on many different shovels.

Save the Planet Clean Water

Travis Hilbig
Ben Butler
David Doughty
Eduardo Martinez

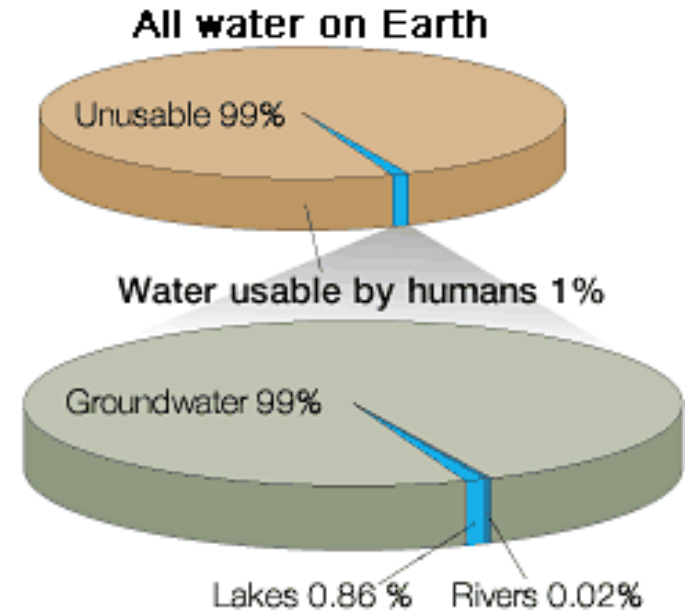

Problem

- Drinkable clean water is a limited resource
- **4000** children die each and every day from consuming contaminated water
- **1.6 billion** people live without electricity
- **1 billion** do not have access to potable water
- **5 million** die every year due to drinking non-potable water and becoming sick

Problem

- Not enough water to go around

A Few Ways to go About It

Heat Focusing Designs:

Dish Design:

Solar Death Ray

Filters:

Carbon Black
Sand and Gravel
Ceramic
Osmosis

UV Purifier:

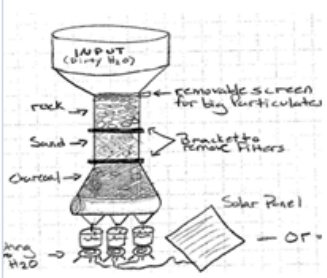

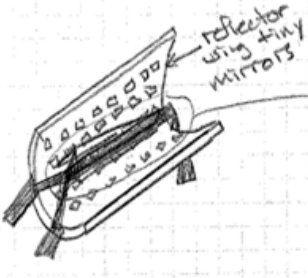

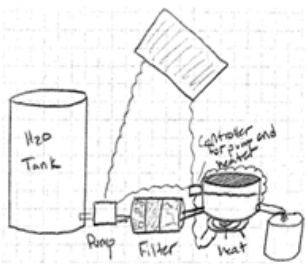

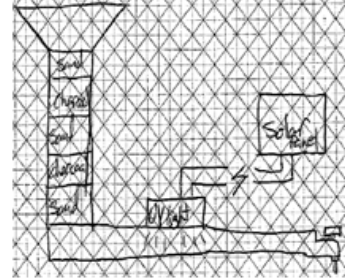

Chemicals:

Parabola

Working Hard

Final Prototype

- Pump to push water through filters
- Evaporator connects to UV purifier
- Faucet give us fresh and clean water!

Edward Mendez
Davis Carlberg

Injection Mold Display Table

Description of Project

- ▣ The main goal of project is to create a fully mobile display unit that holds our injection molding parts in place, safely. The goal is to provide the professor with an easy way to show how the injection molding process works while letting the audience to view all components and parts.
