

<b>Created by:</b> Michelle Crane, 2014	
<i>This project is funded in part by a grant from the National Geographic Society Education Foundation.</i>	
<b>Grade Level:</b> 4 <sup>th</sup>	<b>Time Frame:</b> 45 minutes
<p><b>Learning Outcomes:</b></p> <p>Upon completion of this lesson, students will be able to:</p> <ol style="list-style-type: none"> <li>1. Identify patterns of settlement in Texas during different time periods,</li> <li>2. Describe the location of various cities and towns in the past and present,</li> <li>3. Explain the location of various cities and towns in the past and present, and</li> <li>4. Explain the geographic factors such as landforms and climate that influence patterns of settlement and the distribution of population in Texas, past and present.</li> </ol>	
<p><b>Connection to the Curriculum:</b></p> <p>This lesson is intended to be used in a 4<sup>th</sup> grade Texas history course as part of a unit on Texas population and settlement.</p>	
<p><b>TEKS Strand(s) Objective(s):</b></p> <p>8. understands the location and patterns of settlement and the geographic factors that influence where people live</p> <p>8a. identify and explain clusters and patterns of settlement in Texas at different time periods such as prior to the Texas Revolution, after the building of the railroads, and following World War II</p> <p>8b. describe and explain the location and distribution of various towns and cities in Texas, past and present</p> <p>8c. explain the geographic factors such as landforms and climate that influence patterns of settlement and the distribution of population in Texas, past and present</p>	
<b>Materials:</b>	
<b>For Student Use:</b>	
Scissors and hole punches	If they can be obtained, stickers that are graduated sizes and colors can be used in place of having students cut circles from colored paper. Or use markers and make each color a little bigger.
Pencils	
Colored paper	4 different colors
Glue or tape	
Wall map of Texas	One per class – if a pull down map is not available, there are several other options. A blank county map and a blank river map are available in the module resources for the module. They can be printed out and taped together to make a large map (about 3’x3’). Or a printable, labeled wall map is available for download from National Geographic Education’s MapMaker Kit site. <a href="http://education.nationalgeographic.com/education/maps/texas-tabletop-map/?ar_a=1">http://education.nationalgeographic.com/education/maps/texas-tabletop-map/?ar_a=1</a>
3 circular objects of graduated sizes	Objects should be selected based upon the size of the population.
Settlements of Texas handout	One per pair – included in the lesson plan
Map showing landforms of Texas	

Map showing climate regions in Texas		
<b>For Teacher Use:</b>

**Strategies:** Students will work together to create a graduated circle map representing the growing population of Texas cities since 1850.

**Questions:** Higher level thinking questions (answers are provided in the text of the lesson)  
 Why did people in Texas settle where they did?  
 How did landforms affect the location of Texas settlements?  
 How did climate affect the location of Texas settlements?  
 Explain how settlement in Texas has changed throughout history.

**Procedures to conduct the lesson:**

**Starting the Lesson:** 5 minutes

**Asking Geographic Questions:**

Where do people settle and why?

Tell the students they are going to create a map of Texas showing where people have settled over time and investigate why people choose to settle where they do.

**The Lesson:**

**Acquiring Geographic Information:**

- Before class, use the article from the Texas Almanac to choose cities in Texas for the students to research for their project. Prepare a simplified handout for each pair of students with one city and its population from the decades 1850, 1900, 1950, and 2000.
- Divide students into pairs and give each pair a handout, 4 sheets of colored paper, scissors, glue and have them select objects to trace. They will need several objects depending upon the population of the city they have been assigned.

**Organizing Geographic Information:**

Have the students draw circles and cut them out based upon the size of the population each year. Have them use a ½” circle for population under 1,000, 1” for 10,000, 2” for 100,000 and 4” for a population of 1 million. They should all use the same color for 1850, a 2<sup>nd</sup> color for 1900, a 3<sup>rd</sup> color for 1950 and

a 4<sup>th</sup> color for 2000. Once all the students have cut out their circles, call out a year and have each pair place the appropriate sized circle on the map.

**Analyzing Geographic Information:**

Once the circles have been placed on the map for each year, ask the students questions regarding the distribution of cities and population for each decade.

- Why did people choose to settle where they did? *People were looking for resources like water, good soil, and access to transportation. Many early settlements were located along rivers and transportation routes in areas set aside for land grants by Texas' former colonial powers.*
- How did landforms affect settlement? *People chose to live near bays, rivers, or along the coast to have access to transportation, water, and fish. Areas with fertile farmland were also chosen. Deserts and mountainous areas were avoided, as were areas which were difficult to clear or without access to freshwater. Swampy areas were avoided due to the over-abundance of mosquitoes.*
- How did climate affect settlement? *Areas along the coast were selected because the sea breezes and proximity to water kept the temperatures milder. Areas which were too hot were avoided until air conditioning made living in these areas more comfortable.*
- How did settlement change throughout history? *Some cities remained small throughout Texas' history, but others like Houston and Dallas grew a great deal. Most of Texas' population remained in the eastern portions of the state.*

**End the Lesson:**

Closing product:

**Answering Geographic Questions:**

Write a paragraph explaining where people in Texas chose to live and why.

**Evaluation/Assessment:** Include your assessment product or idea with the lesson plan.

Note, you want your assessment to measure your students understanding of the objectives (listed above).

	<b>Not There Yet</b>	<b>Satisfactory</b>	<b>Clearly Outstanding</b>

# Texas Almanac: City Population History from 1850–2000

The Texas Almanac table shows, for a selected list of cities, a complete record of population for each decennial year, insofar as such record exists. The official census record is presented below, with a few exceptions. Unofficial figures are given where census figures are unavailable. These, as well as other anomalies, are explained in footnotes.

In recent years, the official census has included not only incorporated towns, but also

unincorporated towns that meet certain federal criteria. These are called “Census Designated Places,” and some are included in this list. At least one town from each county is listed. Where no figure is given, it means that no census was taken for it. It does not necessarily mean that the town did not exist. Some Texas towns were in existence many years before incorporating.

City, County	1850	1860	1870	1880	1890	1900	1910	1920	1930	1940	1950	1960	1970	1980	1990	% Change 90–00	2000

# Texas Almanac: City Population History from 1850–2000

The Texas Almanac table shows, for a selected list of cities, a complete record of population for each decennial year, insofar as such record exists. The official census record is presented below, with a few exceptions. Unofficial figures are given where census figures are unavailable. These, as well as other anomalies, are explained in footnotes.

In recent years, the official census has included not only incorporated towns, but also

unincorporated towns that meet certain federal criteria. These are called “Census Designated Places,” and some are included in this list. At least one town from each county is listed. Where no figure is given, it means that no census was taken for it. It does not necessarily mean that the town did not exist. Some Texas towns were in existence many years before incorporating.

\*Census of incorporated towns of Texas taken in 1858 by tax assessors and collectors in each county.

†Federal census of western part of Texas for 1870, as given in Texas Almanac for 1871.

‡An estimate of that date.

\*\*Pelly, Goose Creek and Baytown merged in 1947, and the single community took the name of the latter — Baytown. Baytown was unincorporated prior to this merger and did not show any previous census. However, Pelly and Goose Creek were previously incorporated, hence the census figures for them in 1930 and 1940.

§ Includes Huntsville prison population.
