Conducting a Watershed Survey
Workbook and Curriculum Companion
Grades 3rd - 12th

The preparation of this publication is financed through grants from the U.S. Environmental Protection Agency through the Texas Commission on Environmental Quality.

EPA has not formally reviewed the information in this publication. The views expressed are solely those of the grant recipient.

Conducting a Watershed Survey Curriculum Companion

The purpose of this curriculum companion is to provide classroom lesson plans that enhance the Texas Commission on Environmental Quality (TCEQ) *Conducting a Watershed Survey* publication. To gain the full benefit of this curriculum it is important to have a copy of the *Conducting a Watershed Survey* publication for background information and also as a source of supplemental handouts for students.

This curriculum is meant to provide teachers with a collection of easy to implement lesson plans which aim at connecting our land uses with the health of our surface water. Each group of lessons corresponds to a chapter in *Conducting a Watershed Survey*. Please read the *Conducting a Watershed Survey* first - it offers background information that will show you how to perform a watershed survey in Texas, and also includes interesting facts.

Conducting A Watershed Survey

Table of Contents

Lesson One: Water in Texas

Part One

Activity One: Water Cycle.....	1
Activity Two: Rivers and Basins in Texas.....	4
Activity Three: The Movement of Water.....	6
Part Two: Watersheds and Pollution.....	8
Activity One: Understanding Watershed Pollution.....	10
Activity Two: Build Your Own Watershed.....	12

Lesson Two: Land and Water Uses That Affect Water Quality

Activity One: Old MacDonald's Farmland Fertilizer Dilemma.....	16
Doing the Calculations	19
How much Fertilizer?	20
Mooving Those Cows	22
Activity Two: Phosphates In Your Water,.....	25
Activity Three: Oil and Water Don't Mix	27
Activity Four: Role of Plants in Water Filtration	29

Lesson Three: Background Investigation of a Watershed

Activity One: Hand Land	38
Activity Two: Contour Lines	35
Activity Three: Biography of a River	32
Activity Four: Delineating a Watershed	44

Lesson Four: The Visual Assessment

Activity One: Where did the trash come from?	52
Activity Two: Stream Flow	53
Activity Three: Temperature Measurement and Collection	53

Lesson Five: Extensions

Best Management Practices for Nonpoint Source Pollution	56
Strom Drain Stenciling	59
Clean-Up	61
