RFQ No.: 758-23-09103**

SECTION 1 – GENERAL INFORMATION & REQUIREMENTS

- 1.1 **GENERAL INFORMATION:** The Texas State University System (“Owner”) on behalf of **Texas State University** (“Component”), are soliciting Statements of Qualifications (“Qualifications”) for selection of a Design/Build firm for the **James Street Housing Complex** (“Project”), on the University’s campus in San Marcos, Texas. This solicitation sets forth the terms, conditions, and requirements for prospective Design/Build firms to be considered for this work. (Prospective Design/Build firms are hereinafter referred to as “Respondents”).
- 1.1.1 This Request for Qualifications (“RFQ”) is the first phase in a two-phase process for selecting a Design/Build firm for the Project as provided by *Texas Education Code* §51.780. This RFQ provides the information necessary to prepare and submit Qualifications and for the Owner to evaluate each Respondent’s experience, technical competence, capability to perform, the past performance of the Respondent’s team and members of the team, and other appropriate factors submitted in response to the RFQ, except that cost-related or price-related evaluation factors are not permitted through the initial qualification and ranking of the Respondent. Each Respondent must certify to the Owner that each Architect and/or Engineer (“A/E”) that is a member of its team was selected based on demonstrated competence and qualifications in the manner provided by Section 2254.004, *Texas Government Code*. The response to the RFQ will provide all the information necessary for consideration and initial ranking by the Owner. Based on the initial ranking, the Owner may select a short list of up to five (5) of the top ranked Respondents for an interview. Short-listed Respondents may be required to submit additional information in connection with the interview.
- 1.1.2 In phase two, through a Request for Proposals (“RFP”) issued to the short-listed Respondents, the Owner may request additional information regarding each Respondent’s demonstrated competence and qualifications, considerations of the safety and long-term durability of the project, the feasibility of implementing the project as proposed, the ability of the Respondent to meet schedules, costing methodology, and other factors as appropriate. The Owner will not require Respondents to submit detailed architectural or engineering designs as part of the proposal. The Owner shall rank each proposal submitted on the basis of the criteria specified in the RFP. The Owner shall select the Design/Build firm that submits the proposal offering the best value for the Component on the basis of the published selection criteria and on its ranking evaluations.
- 1.1.3 As part of phase two, the short-listed Respondents will be required to submit a proposal on the Owner-provided proposal form. The proposal form shall be submitted in a sealed envelope with the RFQ/P number and the Respondent’s name clearly stated on the outside of the envelope. The proposal form will include line items that require each of the following to be stated separately: the Proposed Pre-Construction Phase Fee, the Proposed

Construction Phase Fee, and the Proposed General Conditions costs by line item category. **All proposed fees and general condition costs shall exclude any and all architectural and engineering fees.**

- 1.1.4 After the evaluation of information provided under phase two, and any subsequent re-ranking of the short-listed Respondents, the Owner shall first attempt to negotiate an agreement with the highest ranked Respondent. If the Owner is unable to negotiate a satisfactory agreement with the selected Respondent, the Owner shall, formally and in writing, end all negotiations with that Respondent and proceed to negotiate with the next Respondent in the order of the selection ranking until an agreement is reached or negotiations with all ranked Respondents end. In the course of negotiating the agreement, the Owner shall rely on the fee and cost proposals provided by the Respondent under phase two. **Time is of the essence for the Owner in the negotiation of the agreement and Respondent shall take all necessary measures to assure that proposals and revisions to proposals are expedited.** Failure of the Respondent to be responsive and maintain a satisfactory and expedited negotiating schedule shall form the basis for the Owner to end all negotiations with the Respondent.
- 1.1.5 The Owner has established a Design/Builder's Budget Limitation ("DBBL") amount of One Hundred Nine Million Two Hundred Thousand Dollars (\$109,200,000) The DBBL includes a Construction Cost Limitation ("CCL") of One Hundred One Million Five Hundred Thousand Dollars (\$101,500,000). The selected Design/Build firm will be expected to present a Guaranteed Maximum Price Amount (including a mutually agreed upon construction contingency) for Owner's approval at the completion of the one hundred percent (100%) Design Development Documents.
- 1.1.6 Following selection of a Design/Build firm, that firm's A/E shall complete the design, submitting all design elements for review and determination of scope compliance by the Owner before construction. An architect shall have responsibility for compliance with the requirements of Chapter 1051, *Texas Occupations Code*. An engineer shall have responsibility for compliance with the engineering design requirements and all other applicable requirements of Chapter 1001, *Texas Occupations Code*.
- 1.1.7 The successful Respondent will be required to use the Owner's web-based project management software.
- 1.2 **PUBLIC INFORMATION:** All information, documentation, and other materials submitted in response to this solicitation are considered non-confidential and/or non-proprietary and are subject to public disclosure under the Texas Public Information Act (*Texas Government Code*, Chapter 552.001, *et seq.*) after the solicitation is completed. The Owner strictly complies with all statutes, court decisions, and opinions of the Texas Attorney General with respect to disclosure of RFQ information. Additionally, pursuant to the provisions of *Texas Government Code* Section 2261.253, the contract resulting from this solicitation will be posted on the Owner's website.
- 1.3 **TYPE OF AGREEMENT:** Any agreement resulting from this solicitation will be in the form of the Owner's Standard Design/Build Contractor Agreement (the "Agreement"), a copy of which is posted on Owner's website at: <http://www.tsus.edu/offices/finance/capital-projects.html>
 - 1.3.1 The Agreement should be viewed as a draft and is subject to change. The Uniform General Conditions for Construction Contracts referenced in the Contract may be viewed on the Owner's website at:

<http://www.tsus.edu/offices/finance/capital-projects.html>

1.4 **CLARIFICATIONS AND INTERPRETATIONS:** Discrepancies, omissions or doubts as to the meaning of RFQ documents shall be communicated in writing to the Owner for interpretation. Any responses to inquiries, clarifications, or interpretations of this RFQ that materially affect or change its requirements will be issued formally by the Owner as a written addendum. All such addenda issued by the Owner before the Qualifications are due become part of the RFQ. Respondents shall acknowledge receipt of and incorporate each addendum in its Qualifications submittal. Respondents shall be required to consider only those clarifications and interpretations that the Owner issues by addenda. Interpretations or clarifications obtained in any other form, including oral statements, will not be binding on the Owner and should not be relied on in preparing Qualifications. It is the responsibility of all Respondents to check the status of formal addenda regularly and five (5) calendar days before the submission deadline.

SECTION 2 – EXECUTIVE SUMMARY

- 2.1 HISTORICAL BACKGROUND: Texas State University is a public research university located in San Marcos, Texas with a second campus in Round Rock, Texas. It serves over 38,000 students, offering over 200 bachelor’s, master’s, and doctoral degree programs. Texas State University is also classified as a Carnegie “R2: Doctoral Universities – High research activity” and an “emerging research university” by the State of Texas with over \$100M a year in research expenditures. It is comprised of over 8 million gross square feet in facilities and its campuses are located on over 600 acres with an additional 4,000 acres of agriculture, research, and recreational areas.

Founded in 1899 to prepare the best teachers in the state, Texas State University has a legacy of preparing students to make an impact in the world, including Lyndon B. Johnson, the only U.S. president to graduate from a college in Texas.

Texas State University is deeply committed to the success of all students while pursuing Carnegie’s “R1: Doctoral Universities – very high research activity” classification. The university is developing a strategic plan to enhance its Research and Development and intellectual property portfolio, expand its Ph.D. programs, and increase opportunities for post-doctoral research while also developing strategies to further student success.

The University welcomed its 10th president, Kelly R. Damphousse, to the top post in July 2022.

2.2 MISSION STATEMENT: Texas State University is a doctoral-granting, student-centered institution dedicated to excellence and innovation in teaching, research, including creative expression, and service. The university strives to create new knowledge, to embrace a diversity of people and ideas, to foster cultural and economic development, and to prepare its graduates to participate fully and freely as citizens of Texas, the nation and world.

2.3 PROJECT DESCRIPTION, BUDGET, AND SCOPE:

2.3.1 During the information gathering process, numerous items were identified by the university’s Department of Housing and Residential Life, to ensure the success of the James Street Residence Complex. A set of goals and visions have been created for the proposed housing complex as summarized below:

- 2.3.1.1 Affordability of student housing is a driving factor for this Project. The cost per bed will weigh heavily in determining the number of beds the complex can support. The Project aims to provide as many beds as possible, with a minimum of eight hundred eighty-eight (888) beds, and optimally nine hundred thirty (930) beds as envisioned in the Campus Master Plan.
- 2.3.1.2 The Construction Cost Limitation (“CCL”) for the Project is based on past estimates of costs per bed. If savings can be achieved in costs per bed such that generated room revenue more fully pays for the construction, the total CCL could be significantly higher. To answer this question, a financial proforma balancing cost versus revenue expectations shall be completed with the assistance of the Design/Build firm early in the Project.
- 2.3.1.3 The optimal height of the building(s) is seven (7) stories.
- 2.3.1.4 The new complex will provide an ability for residents to identify in smaller communities.
- 2.3.1.5 Several full-time staff apartments are required, depending upon the size and configuration of the complex.
- 2.3.1.6 The complex shall provide mainly double rooms with a limited number of single rooms.
- 2.3.1.7 All resident rooms should provide a large amount of natural daylight and high ceilings, to the extent the building design allows.
- 2.3.1.8 The complex shall provide comfortable, up to date, and accessible on-campus residential facilities that provide a sense of community for students.
- 2.3.1.9 Each community area should provide a distinct entrance and sense of place, with lobby / lounge space for activities, and student study space, to facilitate interaction and engagement.
- 2.3.1.10 Security is important, and all entry / exit points shall be designed to address this requirement.

- 2.3.1.11 Design of the exterior of the building shall provide shared courtyards, including benches, landscaping, and tables, to encourage interaction outside of the building.
- 2.3.1.12 Outdoor space is important and should be considered an attribute during site design. One main pedestrian path for entry to the complex will also provide a clear means to access nearby academic buildings.
- 2.3.1.13 Secured access shall be provided to the complex for move-in/move-out, emergency vehicles, and service vehicles.
- 2.3.1.14 Accessible staff and service parking shall be provided at the complex in compliance with ADA and TAS.
- 2.3.1.15 The project shall address the Texas State University Architectural Design Guidelines in an affordable and cost-effective way.

- 2.3.2 Project program and design requirements can be found in the Design Criteria Package included as Attachment 2.

- 2.3.3 **The total Design/Build Budget Limitation (“DBBL”) for the Project is One Hundred Nine Million Two Hundred Thousand Dollars (\$109,200,000).**

- 2.3.4 **The total Construction Cost Limitation (“CCL”) for the Project is One Hundred One Million Five Hundred Thousand Dollars (\$101,500,000).**

- 2.3.5 **The selected Design/Build team will be required to provide the University with ideas, concepts, options, and constructability management objectives to reduce the cost of the project to include possible deviations from the published Architectural Design Guidelines.**

- 2.4 PROJECT PLANNING SCHEDULE: Key Project planning schedule milestones are:

B. Project Scope

The Texas State University System (“Owner”) on behalf of Texas State University, is soliciting Statements of Qualifications (“Qualifications”) for the selection of a Design-Build firm for the James Street Housing project (“Project”), on the Texas State University, San Marcos, Texas campus. This solicitation sets forth the terms, conditions, and requirements for prospective Design-Build firms to be considered for this work.

Affordability of student housing is a driving factor for this Project. The cost per bed will weigh heavily in determining the number of beds the complex can support. The Project aims to provide as many beds as possible, with a minimum of eight hundred eighty-eight (888) beds, and optimally nine hundred thirty (930) beds as envisioned in the Campus Master Plan. The optimal height of the building(s) is seven (7) stories. The new complex will provide an ability for residents to identify in smaller communities. Several full-time staff apartments are required, depending upon the size and configuration of the complex. The complex shall provide mainly double rooms with a limited number of single rooms. All resident rooms should provide a large amount of natural daylight and high ceilings, to the extent the building design allows. The complex shall provide comfortable, up to date, and accessible on-campus residential facilities that provide a sense of community for students. Each community area should provide a distinct entrance and sense of place, with lobby / lounge space for activities, and student study space, to facilitate interaction and engagement. Security is important, and all entry / exit points shall be designed to address this requirement. Design of the exterior of the building shall provide shared courtyards, including benches, landscaping, and tables, to encourage interaction outside of the building. Outdoor space is important and should be considered an attribute during site design. One main pedestrian path for entry to the complex will also provide a clear means to access nearby academic buildings. Secured access shall be provided to the complex for move-in/move-out, emergency vehicles, and service vehicles. Accessible staff and service parking shall be provided at the complex in compliance with ADA and TAS. The project shall address the Texas State University Architectural Design Guidelines in an affordable and cost-effective way.

The total Design-Build Budget Limitation (DBBL) for the project is \$109,200,000.

The total Construction Cost Limitation (CCL) for the project is \$101,500,000.

The selected Design/Build team will be required to provide the University with ideas, concepts, options, and constructability management objectives to reduce the cost of the project to include possible deviations from the published Architectural Design Guidelines.
