4. <u>HAZARD IDENTIFICATION:</u>

a. Check <u>ALL</u> hazards tha	at apply to the chemical(s) use	d: Refer to Safety Data	Sheets (SDSs).
Sensitizer	Corrosive	Toxic	Irritant
Reproductive Toxin*	Air Reactive/Pyrophoric*	Water Reactive*	Carcinogen*
□Acutely Toxic*	Explosive/Unstable*	Oxidizer	Flammable
Target Organ Hazard (specify organ)		Peroxide Former	
that chemical is a Particula	e using falls into a hazard grou a rly Hazardous Substance (PH nated work area with posted	S) and requires prior app	roval by the PI
b. Location of designate	d work area within lab:		
c. Check <i>ALL</i> additional	hazards that are present who	en the procedure is per	formed.
Fire Hazards	Elevated Temperatures	Heat Gun	Radiation
Cryogen/Low Temp	Pressure or Vacuum	Compressed Gases	Laser or UV Light
Sharps	Moving Parts	Electrical	Biological
Other Hazards (List belo	ow):		

5. HAZARD CONTROL:

a.	Selection and Purchasing: Give the total quantity to be purchased, physical state, and
	from who the chemical(s) will be purchased from (e.g., Sigma-Aldrich, Thermo-Fisher
	Scientific, etc.). When possible purchase small quantities or dilute solutions to reduce
	risk of exposure and minimize waste. Consider safer container options such as
	shatterproof glass, septum- top containers, etc.

b. Engineering Controls:	<i>Check the box</i>	for each o	f the controls to	be used.
--------------------------	----------------------	------------	-------------------	----------

Fume Hood	Biosafety Cabinet	Glove Box	Vented Gas Cabinet
Other (List below plates, auto shut	w: include controls such as part offs, etc.).	ressure relief valves,	intrinsically safe hot

c. Function Check: Are the engineering controls to be used functioning properly?

Fume	e Hood	Biosafety Cabinet	Glove Box	Vented Gas Cabinet
	Yes	Yes	Yes	Yes
	No	No	No	No
	N/A	N/A	N/A	N/A

d. Certification: Are the engineering controls to be used have a current certification?

Fume Hood	Biosafety Cabinet	Glove Box	Vented Gas Cabinet
Yes	Yes	Yes	Yes
No	No	No	No
N/A	N/A	N/A	N/A

5. HAZARD CONTROL: (continued) c. Administrative and Work Practice Controls: List any specific work practices and training needed to safely perform the procedure (e.g., review Safety Data Sheets before using chemicals, do not work alone, must notify other staff members before using chemical, work away from heat sources, etc.).

5. HAZARD CONTROL: (continued) d. Required Personal Protective Equipment (PPE): Check the boxes below for the PPE to be used. For lab coats, gloves, and respirators list the exact types to be used (e.g. flame-resistant coat, Nitrile gloves, non-venting goggles, etc.). Note: If respirators are to be used contact EHSREM at ehs@txstate.edu prior to purchasing and using. Respirator Lab Coat (type): Chemical Apron Safety Glasses Other: List Below Gloves (type): Goggles (type): Face Shield e. Storage and Transportation Describe how the chemical will be stored away from incompatible materials (i.e., flammables storage cabinet, refrigerator, glovebox, etc.). Describe how the chemical will be transported inside and outside of the laboratory (e.g. on cart in containment tray). Note: If the chemical is to be transferred to a secondary container, the container must be labeled with the chemical name and hazard warnings. Contact EHSREM at ehsatstate.edu for blank labels.

6. <u>EMERGENCY PROCCEDURES: SPILLS, EXPOSURES, FIRES:</u>

the lab and give the location where it may be found.
Fire Extinguisher, Location:
Safety Shower, Location:
Safety Eyewash, Location:
First Aid Kit, Location:
Chemical Spill Kit, Location:
Emergency Contact List, Location:
b. Spills: Describe the procedures to be followed in the event of a chemical spill, include any contact information that is not found in Section 3. Emergency Contacts .

6. EMERGENCY PROCCEDURES: SPILLS, EXPOSURES, FIRES: (continued)		
	ire : Describe the procedures to be followed in the event of a fire, include any contact formation that is not found in Section 3. Emergency Contacts .	
•	e Contact: Describe procedure to be to be followed in the event of an exposire to the eyes, lude any contact information that is not found in Section 3. Emergency Contacts.	
	in Contact: Describe the procedure to be followed in the event of an exposure to the skin, lude any contact information that is not found in Section 3. Emergency Contacts .	

	IERGENCY PROCCEDURES: SPILLS, EXPOSURES, FIRES: (continued)
f.	Ingestion: Describe the procedure to be followed in the event of chemical ingestion, include contact information that is not found in Section 3. Emergency Contacts .
_	Inhalation: Describe the procedure to be followed in the event of an inhalation exposure, include any contact information that is not found in Section 3. Emergency Contacts .

7. PROCEDURE: Describe each step of how the procedure is performed, be sure to include In the "Hazard and Hazard Controls and PPE" column list the hazard(s) associated with each step and the engineering controls and PPE that must be used. Enter decontamination procedures and how to store and dispose hazardous waste in Section 8, "Waste Disposal and Decontamination Procedure" on page 12.

Describe how hazardous waste is stored and disposed. Any chemical waste must be disposed of as hazardous waste in accordance with the Texas State Hazardous Waste Management Program. Also, if any of the chemical(s) used are considered a Particularly Hazardous Substance (PHS) describe how work surfaces and other items will be decontaminated after use. If you have specific questions about disposal, please contact EHSREM at ehs@txstate.edu .					
)niaci EHSF 	KEM at <u>ens(a).xs</u>	<u>laie.eau</u> .			

8. Waste Disposal and Decontamination Procedure:

9. <u>Documentation of SOP review:</u>

The PI and lab worker must sign to verify that the worker has read and understands this SOP prior to performing work with the chemical listed in this SOP. These signatures will also serve as giving worker prior approval to use a chemical classed as a Particularly Hazardous Substances (PHS).

Worker Name (print)	Worker Signature	PI Signature	Date
