

IV. EXISTING REMODELING OF CAMPUS PROJECTS CONSTRUCTION STANDARDS

Hazard Communication Program

- A. The Architect/Engineer and contractor shall comply with Texas State University's Hazard Communication Program.
- B. This policy is available online at: <https://policies.txstate.edu/university-policies/04-05-06.html> or in the office of Facilities Planning, Design and Construction.
- C. MSDS sheets must be submitted to the Project Representative for approval prior to the use of materials which pose a health hazard as defines by the Hazard Communication Program.
- D. A Work Area Chemical List (WACL) shall be maintained by the Contractor.
- E. The WACL shall contain copies of MSDS for each material listed.
- F. Original container labels on incoming containers of hazardous chemicals may not be removed or defaced.
- G. Chemicals transferred to other containers must have labels affixed on the container which contain the following information: chemical name, manufacturer name and address, health or physical hazard, target organ, effects and personal protective equipment required.
- H. Chemicals shall not be stored in unlabeled containers.
- I. As part of project close-out, the Contractor shall be required to forward all MSDS information to the Project Representative.
