89th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

754 Texas State University

Honorable Members of the Texas Legislature,

As Texas State University celebrates its 125th anniversary, we stand at the threshold of becoming a global leader in education and research. Your unwavering support for higher education has been instrumental in our continued success, and we extend our deepest gratitude. As we approach this legislative session, your backing is more critical than ever, promising unparalleled returns on the state's investment.

We are immensely thankful to the Legislature and Texas voters for the bold vision to create the Texas University Fund (TUF) in the prior session. As the eighth-largest economy globally, Texas requires more top-tier research universities, and TUF is accelerating Texas State's journey toward that goal. Since initially receiving a partial share of TUF, we have now qualified for a full share due to our continuing growth in research productivity. The estimated additional state contribution to the corpus of the TUF to fund a full share for Texas State is approximately \$700 million, which would occur outside the budget bill pattern.

Size and Impact

In Fall 2022, Texas State boasted the 24th largest undergraduate enrollment nationwide and the 4th largest in Texas. While not the largest in Texas, our enrollment surpasses that of any public university in 33 other states. Our size enables us to offer world-class educational opportunities, a source of immense pride. Texas State's student demographics mirror those of our state more closely than any other university. We serve students from every region, socioeconomic background, and political perspective, embodying the melting pot of Texas. Designated a Hispanic Serving Institution since 2010, we had the 13th largest Hispanic student enrollment among U.S. universities in Fall 2022.

Commitment to Student Success and Affordability

Our top priority is student success, with graduation rates for African American and Hispanic students exceeding state averages and continually improving. Over the past decade, we have increased total degrees awarded by over 14%, with degrees awarded to Hispanic and African American students rising by 70% and 79%, respectively. Texas State has a long-standing commitment to affordability. Among our Top 10 peer institutions, we have the fourth lowest tuition and fees while receiving the most applications through the Apply Texas portal. Our affordable tuition is achieved through exceptional efficiency, yet we face national inflationary pressures. We request the Legislature to focus on funding formulas to achieve rates recommended by the Texas Higher Education Coordinating Board's Formula Advisory Committee and the Higher Education Fund (HEF) Committee. These two items, along with the additional contribution to the TUF corpus, are our largest priorities.

Exceptional Item Appropriation Requests

State presents several exceptional item appropriation requests, each poised to make a statewide impact:

1. Institutional Enhancement Support: A \$25 million annual increase to align our state appropriations with peers as we currently rank 35th of the 37 general academic institutions in Texas in per-student academic appropriation support.
2. Round Rock Campus Expansion: A \$2.5 annually million to address the explosive population growth in Williamson County and Round Rock, expanding educational and workforce development services and enhancing community engagement.

Administrator's Statement

8/16/2024 1:57:05PM

89th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

754 Texas State University

3. Student Success Center: A \$2 million annual to support programs aimed at increasing student retention, graduation, and career placement.
4. STEM Neighborhood Pedestrian Overpass: \$4 million for a pedestrian route across Comanche Street, ensuring safe access to a new academic and residential neighborhood.
5. Texas School Safety Center (TxSSC) and (6) Advanced Law Enforcement Rapid Response Training (ALERRT) Center: An 8% increase in appropriations (\$1.44 million for TxSSC and \$1.36 million for ALERRT across the biennium) to maintain operations and \$25 million for ALERRT's training facilities build-out. The Federal government is poised to give 75 acres of land to Texas State for an ALERRT campus with the stipulation it is built out within 3 years.

While we recognize CCAP funding is unlikely this session, we have included our top two new facility needs here for your consideration now or in the future. We request \$100 million in CCAP support for a \$226.8 million Chemistry Building in San Marcos to support our planned R1 research status, and \$70 million in CCAP support for a \$110 million Multi-Purpose Building to accommodate our planned growth to 10,000 students in Round Rock.

A Bright Future for Texas State University

With your support, Texas State University is poised for a bright future, continuing to deliver exceptional education, advancing research, and driving innovation. We are committed to making Texas the best place to live, work, and do business in the country.

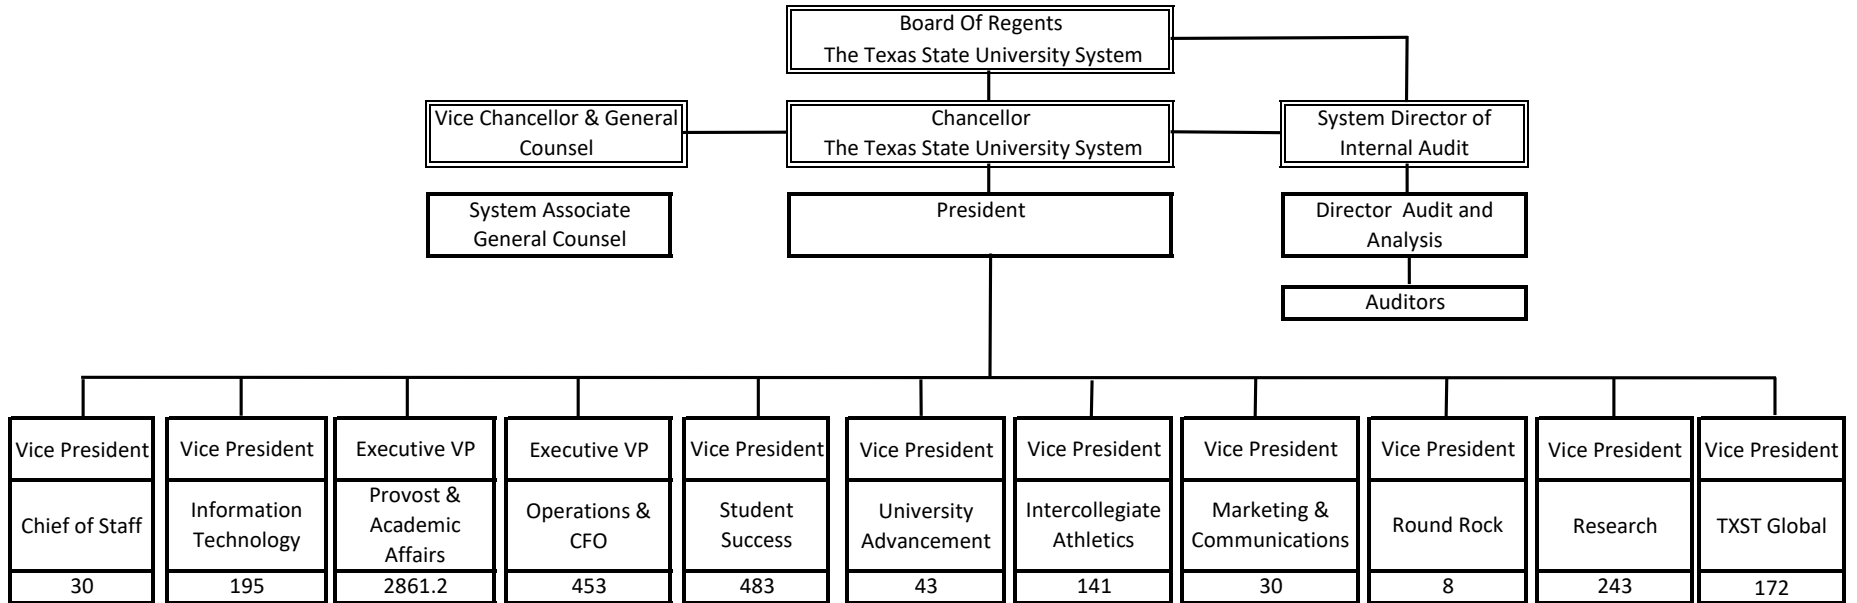

I look forward to discussing our request with you.

Sincerely,

Kelly Damphousse
President

The university conducts criminal background checks on applicants for vacant security-sensitive positions on a post-offer/pre-hire basis pursuant to Section 51.215 of the Education Code as amended. The university has declared all positions as security sensitive.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, research enhancement, student services and institutional support. The funds are distributed on a weighted semester credit hour basis. The rate per weighted semester credit hour is established by the Legislature each biennium.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

(1) - Formula funded strategies are not requested in 2026-27 because amounts are not determined by institutions.

CODE	DESCRIPTION	Exp 2023	Est 2024	Bud 2025	BL 2026	BL 2027
------	-------------	----------	----------	----------	---------	---------

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy provides for the costs of activities or enterprises separately organized and operated in connection with instructional departments primarily for the purpose of giving professional training to students as a necessary part of the educational work of the related departments. At Texas State this includes the operations of the Freeman Ranch, the Childhood Development Center, Speech & Hearing Clinic, the Sleep Lab, the Physical Therapy Clinic, and the Clinic for Autism Research, Evaluation, and Support.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The effectiveness of this strategy is affected by a number of internal and external factors such as salaries paid to comparably qualified staff members within the region, the client load of the student clinicians, the availability of comparable services in the surrounding community, market prices that can be charged for services and that are received for goods sold, market prices that must be paid for raw materials, the level of supervision that is provided, and the cost of capital equipment necessary to support the operation.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Infrastructure Support formula distributes funding associated with plant-related formulas and utilities. This formula is driven by the predicted square feet for universities' educational and general activities produced by the Coordinating Board Space Projection Model. The portion of the formula related to utilities is adjusted to reflect differences in unit costs for purchased utilities, including electricity, natural gas, water and wastewater, and thermal energy.

The mission of Round Rock Campus (RRC) is to meet the higher education and workforce training needs of north Austin and Williamson County. The RRC started as an evening program with about 75% of the students that were working adults during the day and attending classes on a part-time basis in the evenings. In 2010, the St. David's School of Nursing opened to undergraduate nursing students studying for the Bachelor of Science in Nursing (BSN) in a full-time program of study. In 2018, the programs of Communication Disorders, Physical Therapy, and Respiratory Care were relocated from the San Marcos Campus to the RRC. Students in the three programs included full-time undergraduate, graduate, and professional doctoral students. The Physical Therapy Clinic and the Speech-Language-Hearing Clinics opened as a community resource in 2018, in addition to the Ascension Seton Williamson Sleep Center at Texas State University. In 2021, the programs of Health Information, Management Information, and Radiation Therapy were relocated from the San Marcos Campus to the RRC offering undergraduate and graduate programs. In Fall 2024, 11 new academic programs in various disciplines were added to the RRC to expand educational opportunities within the region. In addition, a selection of general education courses are being taught so that students will be able to start and complete their degree at this campus.

CODE	DESCRIPTION	Exp 2023	Est 2024	Bud 2025	BL 2026	BL 2027
------	-------------	----------	----------	----------	---------	---------

STRATEGY DESCRIPTION AND JUSTIFICATION:

In response to the tragic event at Robb Elementary School, Governor Greg Abbott instructed Executive Director Dr. Pete Blair to begin providing Texas State University's nationally recognized Advanced Law Enforcement Rapid Response Training (ALERRT) programs to all school districts across the state, prioritizing school-based law enforcement.

The tragedy in Uvalde reinforces the need for police officers to receive high-quality and frequent training if responding officers are going to perform well in a crisis. While the State of Texas has funded ALERRT to provide high-quality response training for some time, such training is not currently required in the State of Texas. Several other states have mandated ALERRT training in their training academies (e.g., Oklahoma, Virginia), and ALERRT has been recognized as the national standard for active shooter response training by the FBI.

This request includes a multipronged approach to improve the ability of Texas Peace Officers to respond to critical incidents.

The mission of EARDC is to: 1) perform basic and applied research on, and disseminate information about, the Edwards Aquifer and regional water resources; 2) offer laboratory and technical services to public and private entities and support graduate research; 3) use data to provide educational services for schools and the public. The Center coordinates its activities with those of other water-related centers at Texas State and in Texas. The Center provides opportunities for students, interns, and volunteers to obtain work experience in the water resources field. We also provide jobs for many students and provide facilities for post-doctoral, graduate, and undergraduate research. Through our education program of field days and summer camps, we expose hundreds of K-12 students to in-depth experiences in aquatic sciences. The time they spend at EARDC allows them to gain insight into the college experience and may encourage them to seek future admission to Texas State. It is important that we have a citizenry informed about water resources, and our student-oriented programs promote this. The importance of having a working water laboratory that is always available to support research, classes, educational activities, and the public cannot be overemphasized. Few universities have NELAC-certified laboratories that produce data accepted by state and federal agencies. EARDC provides important services to local and regional communities, scientists, and water providers.

STRATEGY DESCRIPTION AND JUSTIFICATION:

MARC's primary purpose is to ensure Texas State has a culture of flexibility, responsiveness, and relevance in the delivery of its mission, accelerate the introduction of new platforms, and enable technologies encompassing a broad range of applications such as SMART infrastructure, autonomous vehicles, renewable energy systems, disease detection, medical devices, medical diagnostics, energy storage, drug development tools, next-generation sensors and wireless networks, MEMS and data analytics supporting new technologies. MARC provides a seamless environment integrating applied multidisciplinary academic research, industry-sponsored projects, and experiential learning opportunities for students addressing the creation of a sustainable talent pipeline. Access to specialized tools and expertise enables early and growth-stage companies to efficiently access otherwise costly instruments and equipment accelerating their market entry while providing faculty opportunities to interact and students to gain experience. The MARC leadership team provides added value through (1) objective evaluation of university capabilities and opportunities; (2) early vetting of commercialization proposals and (3) mentoring for early-stage firms associated with MARC activities increasing their potential for success.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The mission of the Texas School Safety Center (TxSSC) is to serve schools and communities to create safe, secure, and healthy environments. The TxSSC is housed at Texas State University and was established in 1999 following the tragic Columbine school shooting. The TxSSC is legislatively charged to serve as the central clearinghouse for the dissemination of safety and security information, including training, technical assistance, and research for K-12 schools, charter schools, and junior colleges throughout the state of Texas. The TxSSC provides training on a variety of topics such as emergency operations planning, drilling and exercising, the school safety and security audit process, school behavioral threat assessment, and specialized training for school-based law enforcement officers. In addition, the TxSSC is charged with developing model safety and security audit procedures for school districts and collecting results of the safety and security audits from school districts. The TxSSC also oversees the annual review of district Multi-Hazard Emergency Operations Plans (EOPs). Further, the TxSSC oversees and maintains the Texas Safety and Security Consultant Registry and publishes the state-mandated Sheriff school safety meeting reports. The TxSSC is a leading entity in supporting safe and healthy schools in Texas and is relied upon for assistance and guidance throughout the nation.

The mission of the Forensic Anthropology Center is to provide education and outreach, case management, and identification and repatriation services for unidentified deaths in Texas through Operation Identification (OpID). OpID is an initiative within the Forensic Anthropology Center at Texas State University with a mission to facilitate the identification and repatriation of unidentified human remains in rural counties without medical examiners. These counties, especially those near the Texas side of the Mexican border face overwhelming numbers of deaths per capita, creating chronic mass disasters in the Texas borderlands. Because these counties lack the resources to properly investigate unidentified persons' deaths, decedents are often buried in temporarily marked graves that are not kept track of in any centralized office. As a result, state-mandated investigative services, including the collection and submission of biometric postmortem data and entering case information into the National and Unidentified Missing Persons System (NamUs), often do not happen. OpID works to intercept these unidentified human remains prior to burial and provide legally compliant case management that concludes with identification, family notification, and repatriation. OpID also exhumes individuals who have not received state-mandated investigative services.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This funding is used to support our core strategy, namely instruction and operations by providing funding for new academic program start-up and faculty salaries. These funds ensure the university’s ability to recruit highly qualified faculty and keep salaries competitive. In addition, this funding is critical to our efforts to produce competitive programs in the high demand areas of nursing, engineering, and business, as well as, our continued investment in producing quality educators.

In addition, this strategy includes License Plate revenues used to pay scholarships.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Additional information for this strategy is available in Schedule 9, Non-Formula Support Information.
 In addition, there is an Exceptional Item request for additional funding presented in this LAR.

DESCRIPTION / JUSTIFICATION:

Texas State University receives less state support per student than most universities in Texas. We currently rank 35th in this measure out of the 37 general academic institutions in Texas. This additional funding would put us near the average amount of funding provided by the state to our peer institutions on a per-student basis and ensure our ability to recruit highly qualified faculty and staff to produce and support competitive programs that transcend existing disciplines and boundaries to create and apply new knowledge.

The State of Texas is at the forefront of innovation, discovery, and entrepreneurial activities around the globe. One driver of the innovation ecosystem we have built in Texas is the support the state has provided to higher education. Texas State University is a striking example of the success of that support. We are focused on instruction and research that has practical value and real-life applications that can change the world. Our faculty and students are generating new knowledge, catalyzing ideas into reality, and pushing the boundaries in every discipline.

These funds will advance our student-centered mission to serve the educational needs of the diverse population of Texas and the world beyond. We will do this by integrating instruction and research. The university focuses its efforts on priorities that emerge from our mission and strengths, that advance academic and industry needs, that meet state and national economic and employment needs, and that encourage cross-disciplinary collaboration and innovation.

EXTERNAL/INTERNAL FACTORS:

TXST's Carnegie Classification reached its current classification as an R2 doctoral university with high research activity in 2018. We anticipate achieving R1 status in 2027.

TXST has set freshmen enrollment records for 10 out of the last 11 years and will reach 8,000 freshmen for the first time in Fall 2024.

FULL-TIME EQUIVALENT POSITIONS (FTE):		21.00	21.00

DESCRIPTION / JUSTIFICATION:

As the Texas State University Round Rock Campus plans to grow its enrollment to 10,000 students, additional appropriations would be utilized to bolster our operational support, enhance community engagement, and expand student support services. The Round Rock Campus is a vital educational hub serving a growing population in Central Texas. Our campus plays a critical role in addressing the educational and workforce needs of the region, particularly in healthcare, computer science, technology, business, and public service sectors. As we continue to expand our program offerings and partnerships with local industries, the need for increased funding becomes imperative to sustain our momentum and address the emerging needs of our students and the community.

EXTERNAL/INTERNAL FACTORS:

The request for an additional \$2.5 million per year in appropriations for the Texas State University Round Rock Campus is driven by a combination of internal and external factors. Internally, Texas State's growth both in San Marcos and at the Round Rock campus has created significant demands on existing resources making it challenging to allocate adequate resources needed to keep up with the growth at Round Rock. Externally, the Central Texas region is experiencing explosive population growth, which intensifies the demand for educational and workforce development services. This rapid expansion places additional strain on our resources, necessitating increased funding to expand program offerings and student support services. Furthermore, the campus is deeply embedded in the community, the increased appropriation will enable us to enhance our community engagement efforts, fostering stronger collaborations that benefit both students and local industries. This investment is crucial for ensuring that we can continue to meet the educational and economic needs of the rapidly growing Central Texas region, ultimately contributing to the social and economic development of the entire state.

DESCRIPTION / JUSTIFICATION:

To better serve all of the citizens of Texas, Texas State University has set a university goal to aggressively raise retention and graduation rates and create more credentialed students. Our goal is to provide a pathway for all Texas State students to graduate within four years, while lowering cost and student debt, with a career that matches the skills provided by their major. Texas State University will need to focus on identifying and overcoming barriers to improve student completion rates. To help meet these goals, Texas State University requires a collaborative and analytical approach for tracking student performance and assessing the impact of academic, financial, socio-emotional, and co-curricular interventions. The Student Success Center (SSC) will be dedicated to the consolidation and interpretation of existing data and research on college completion and post-college success at Texas State, as well as implementing the latest in student success innovations at a scale which will accelerate time to degree, lower costs, and ensure career readiness.

With over 40% of our students classified as first-generation, 30% as transfer students, and over 30% as Pell-eligible, Texas State University is considered a leader in social mobility and student access. Texas State was ranked #38 in the nation in 2023 for social mobility by researchers at Ed Reform Now. Texas State is uniquely positioned to assist students with their success and also serve as an incubator for innovative, evidence-based practices to increase degree-attainment, enrollment, persistence, and career readiness. The proposed Student Success Center will not only serve as a university hub for student achievement but will share and broadcast our work to enhance student success across the State of Texas.

Agency code: **754**Agency name: **Texas State University**

CODE	DESCRIPTION	Excp 2026	Excp 2027
-------------	--------------------	------------------	------------------

EXTERNAL/INTERNAL FACTORS:

Through real-time data analytics and the adoption of research-based practices, the Student Success Center will be able to make retention, graduation, and career readiness gains at a scale that will be a national model for student intervention and achievement. We will accomplish this by federating student success efforts in one locale, creating a more efficient delivery of services.

Texas State University is committed to supporting the Higher Education Coordinating Board's 60x30 plan to ensure 60% of Texans have obtained a high quality post-secondary degree to meet the talent needs of the state. Over 80% of Texas State graduates go onto live and work in the state of Texas after graduation fueling the state economy. In order to achieve this goal, Texas State must codify our efforts in retention and degree pathways.

PCLS TRACKING KEY:**DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :**

Total funding of \$2,000,000 for out-year costs represent a combination of IT, ongoing maintenance, and administrative costs to develop the Student Success Center and support ongoing work. Out-year costs will fund \$770,000 in salary and wages supporting 13 FTE per year.

ESTIMATED ANTICIPATED OUT-YEAR COSTS FOR ITEM:

2028	2029	2030
\$2,000,000	\$2,000,000	\$2,000,000

CODE	DESCRIPTION	Excp 2026	Excp 2027
	Item Name: STEM Pedestrian Overpass Item Priority: 4 IT Component: No Anticipated Out-year Costs: No Involve Contracts > \$50,000: Yes Includes Funding for the Following Strategy or Strategies: 03-05-01 Exceptional Item Request		
OBJECTS OF EXPENSE:			
5000	CAPITAL EXPENDITURES	1,500,000	2,500,000
TOTAL, OBJECT OF EXPENSE		\$1,500,000	\$2,500,000
METHOD OF FINANCING:			
1	General Revenue Fund	1,500,000	2,500,000
TOTAL, METHOD OF FINANCING		\$1,500,000	\$2,500,000

DESCRIPTION / JUSTIFICATION:

The Science Technology Engineering Math Neighborhood Pedestrian Overpass is proposed to provide safe access for faculty, staff, and students to access the newly-created residential, classroom, and research neighborhood on Texas State's San Marcos campus. The bridge across Comanche Street (a public right of way running through the middle of campus) will provide a safe and convenient pedestrian route away from traffic to and from classrooms, labs, residence halls, parking garages, the Alkek Library, and the LBJ Student Center.

The STEM Classroom Building is expected to be complete and open for classroom instruction and faculty offices in the summer of 2026, and the new 1,000-bed Canyon Residence Hall will open in Fall 2025. With this addition to the neighborhood, approximately 3,600 more students will need to traverse Comanche Street for class changes, adding a potential increase of over 20,000 student crossings per day in an area that already has an unsafe number of pedestrian/vehicular interactions.

The main entrances to the Ingram Engineering Building, the Supple Science Building, and the new STEM Building all require students to cross Comanche Street midway between two lighted intersections, making a signalized crosswalk untenable to the local authorities governing the road. Pedestrians and vehicles in this area have minimal sight lines due to the topography.

The proposed bridge will provide safe pedestrian access to the Texas State STEM neighborhood.

EXTERNAL/INTERNAL FACTORS:

INTERNAL factors impacting cost:

Utilities located in this area, owned by the University, will require relocation around the structure to support the bridge.

4.A. Exceptional Item Request Schedule
 89th Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: **8/16/2024**
 TIME: **1:59:46PM**

Agency code: **754**

Agency name: **Texas State University**

CODE	DESCRIPTION	Excp 2026	Excp 2027
-------------	--------------------	------------------	------------------

The entrance into the Alkek Library parking garage will require temporary closures and re-routing of traffic.
 Access to the plaza area above the Alkek garage will require modification to include accessible access to the new bridge.

EXTERNAL factors:

Utilities within the R.O.W., owned by other parties, will require re-routing in order to install the bridge.

There will be temporary traffic shutdowns during the construction of the bridge.

The access to the City of San Marcos Water Well is through the site of the planned bridge and will require re-routing. While the bridge is under construction, temporary access to the well will be required through the construction site.

Comanche Street is the sole remaining public street bisecting the Texas State Campus and already has multiple stop signs and stop lights slowing traffic. The city is not willing to add another signalized crosswalk along the street. Based on the anticipated pedestrian volume, such a crosswalk could effectively create gridlock for vehicles attempting to use this street, which would create a ripple effect impacting traffic in the entire surrounding area.

PCLS TRACKING KEY:

APPROXIMATE PERCENTAGE OF EXCEPTIONAL ITEM : 30.00%

CONTRACT DESCRIPTION :

This project will require the solicitation of Professional Surveying, Civil & Structural Engineering, Architects, and Landscape Architects. TXST will provide management and contract procurement.

FULL-TIME EQUIVALENT POSITIONS (FTE):		6.00	6.00

DESCRIPTION / JUSTIFICATION:

The mission of the Texas School Safety Center (TxSSC) at Texas State University is to serve schools and communities to create safe, secure, and healthy environments. The TxSSC is housed at Texas State University and was established in 1999 following the tragic Columbine school shooting. The TxSSC is legislatively charged to serve as the central clearinghouse for the dissemination of safety and security information, including training, technical assistance, and research for K-12 schools, charter schools, and junior colleges throughout the state of Texas. In addition, the TxSSC is charged with developing model safety and security audit procedures for school districts and collecting results of the safety and security audits from school districts. The TxSSC also oversees the annual review of district Multi-Hazard Emergency Operations Plans (EOPs).

Additional funding would allow the TxSSC to increase its capacity to more robustly serve Texas school districts and junior community colleges. Specifically, additional funding would support the statewide implementation and delivery of annual regional tabletop exercises with school districts across Texas to further enhance their emergency operations planning efforts. Exercising is a vital component of a comprehensive emergency management program in schools and fosters multi-jurisdictional collaboration and planning. Further, the TxSSC seeks to expand its in-house EOP review software to develop an interactive platform that allows school districts to build their plans that the TxSSC is already charged to review on an annual basis. Additional funding would support the increase in staffing, travel expenses, and operational costs to help effectively carry out these critical functions to further support Texas schools.

EXTERNAL/INTERNAL FACTORS:

Training, drilling, and exercising are key features of a comprehensive emergency management program and facilitate the establishment of a culture of preparedness. Preparedness builds the capability to respond effectively and recover from emergency incidents. An exercise is an instrument to train, assess, practice, and improve

-------------	--------------------	------------------	------------------

performance in prevention, mitigation, preparedness, response, and recovery in a risk-free environment. Exercises tend to be more complex than drills, and it is crucial that districts conduct exercises that match their experience and capabilities. It is highly recommended to begin with discussion-based exercises such as tabletop exercises.

School districts are requesting more guidance and support to help facilitate regular tabletop exercises to further enhance their emergency planning efforts . As the central clearinghouse for school safety in Texas and charged to provide technical assistance, we are seeking additional funding to support this critical need and expand our internal resources to execute this work with fidelity across Texas. Further, the ability for school districts to build their planning documents within the TxSSC EOP software that reviews them will help to streamline the process for districts and create more consistency across all planning documents.

TOTAL, METHOD OF FINANCING		\$25,680,000	\$680,000
FULL-TIME EQUIVALENT POSITIONS (FTE):		0.40	0.40

DESCRIPTION / JUSTIFICATION:

The training provided by the ALERRT Center at Texas State University has recently been mandated for all law enforcement officers throughout the State of Texas by Governor Greg Abbott. Our current facilities are insufficient in space to meet the growing demands of that training and are located on federally-owned land. This request will allow us to secure the ownership of this federal land at no cost, (likely a \$15 million savings) and to better serve and protect the State of Texas.

The number of staff at the ALERRT Center has doubled within the last 10 years to keep up with the growth in our training demand, leaving inadequate space for employees at the primary location in Maxwell, Texas. To address these limitations, we've had to place employees in rented private spaces off-site and use portable temporary buildings. As the demand for our free training continues to increase, we need to build new facilities that can accommodate that growth, increased training, and the amount of training supplies we ship around the country. This would include a new administration building, housing, a vehicular test track, refined weapon firing ranges, and a logistics warehouse.

While we provide our training at no cost to Texas law enforcement agencies, the cost of hotels poses a significant barrier to many smaller agencies across Texas. Dormitory housing on-site is needed to remove that barrier and allow more officers to attend our training. In addition, we would construct a series of buildings creating an urban environment training area to simulate active attack training scenarios. Creating additional roadways to these facilities and security fencing would also be required. The ongoing funding will allow us to continue to enhance our mission.

Agency name: **Texas State University**

CODE	DESCRIPTION	Excp 2026	Excp 2027
-------------	--------------------	------------------	------------------

EXTERNAL/INTERNAL FACTORS:

The primary external factor is that the ALERRT campus is currently located on federal land owned by the Department of Labor. Texas State has worked diligently over the past three years and is very near to completion, of the process to receive ownership of 75 acres of this federal land at no cost in perpetuity to use as the ALERRT campus. However, we have a three-year window to build out the site before the first audit by the General Services Administration.

We have been told directly that failure to build out the site for this use could result in the federal government taking the land back. The main internal factor currently consists of limited resources available from Texas State University alone, whose primary revenue source is student tuition and not appropriate to build out the ALERRT Center campus, which limits our ability to secure funding for the construction of these needed facilities.

PCLS TRACKING KEY:

DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :

Out-Year cost are to support ongoing operations.

ESTIMATED ANTICIPATED OUT-YEAR COSTS FOR ITEM:

2028	2029	2030
\$680,000	\$680,000	\$680,000

APPROXIMATE PERCENTAGE OF EXCEPTIONAL ITEM : 75.00%

CONTRACT DESCRIPTION :

This project requires specialized skills and expertise to complete the work efficiently and effectively that will be managed by facility staff at Texas State.

OBJECTS OF EXPENSE:			
2008	DEBT SERVICE	14,825,000	14,825,000
TOTAL, OBJECT OF EXPENSE		\$14,825,000	\$14,825,000
METHOD OF FINANCING:			
1	General Revenue Fund	14,825,000	14,825,000
TOTAL, METHOD OF FINANCING		\$14,825,000	\$14,825,000

DESCRIPTION / JUSTIFICATION:

This funding is for the debt service payment on the capital construction assistance project bonds that will be used to construct a Chemistry Building (\$8,720,000 in annual debt service based on \$100 million in CCAP towards a \$226.8 million total cost) on the San Marcos Campus and a new Multi-purpose Building (\$6,105,000 in annual debt service based on \$70 million in CCAP towards a \$110 million total cost) on the Round Rock Campus. Debt service is calculated based on a 20-year term and 6% interest rate.

EXTERNAL/INTERNAL FACTORS:

Interest rates on tax-exempt bonds could change by the time the appropriation is ultimately made and thereby impact the cost of the strategy.

PCLS TRACKING KEY:**DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :**

Anticipated out year cost is continued debt service payments for the life of the bond issuance.

26.0%	Other Services	26.0 %	10.5%	-15.5%	\$3,397,619	\$32,469,296	26.0 %	9.8%	-16.2%	\$4,119,423	\$41,988,428	
21.1%	Commodities	21.1 %	24.5%	3.4%	\$9,410,023	\$38,432,227	21.1 %	23.4%	2.3%	\$11,985,259	\$51,150,324	
	Total Expenditures		21.3%		\$27,832,794	\$130,828,070		20.8%		\$35,779,415	\$171,969,181	

B. Assessment of Attainment of HUB Procurement Goals

Attainment:

- The agency attained or exceeded 2 of 5 of the applicable statewide HUB procurement goals for FY22 or 40%
- The agency attained or exceeded 2 of 5 of the applicable statewide HUB procurement goals for FY23 or 40%

Applicability:

- Applicable to all procurement categories, except heavy construction, Texas State does not have any heavy construction, which is mainly for TxDOT use.

Factors Affecting Attainment:

- There is a lot of competition for HUB subcontractors in the Austin-San Antonio corridor.
- Most HUB vendors are not responding to solicitations. Prime contractors state the reason for no response or not interested is that sometimes the scope of the work is too big or too specialized.
- Use of indefinite delivery/indefinite quantity (IDIQ) contracts for Special Trade categories to leverage spend for smaller remodel and repair projects provides limited bidding opportunities for HUBs.
- Use of Co-op contracts decrease bid opportunities for HUBs.

C. Good-Faith Efforts to Increase HUB Participation

Outreach Efforts and Mentor-Protégé Programs:

- Economic Opportunity Forums (EOF's) /HUB Outreach Events - Hosted Meet the Buyer in FY22 and HUB Construction Forum in FY23. Participated in regional and statewide EOF's and other HUB focused outreach events (FY22 & FY23)

6.A. Historically Underutilized Business Supporting Schedule
89th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

Date: **8/16/2024**Time: **1:59:50PM**

Agency Code: **754** Agency: **Texas State University**

-HUB Mentor-Protégé - During FY22 and FY23 we had 7 active Mentor-Protégé agreements.

HUB Program Staffing:

-HUB Vendor Training - Held 1-on-1 consultations with HUB Vendors to educate them on doing business with Texas State.

Current and Future Good-Faith Efforts:

-HUB "Best Practices" - Actively participated in HUB Discussion Work Group (HDWG) to identify HUB outreach best practices and keep abreast of issues regarding the State HUB program.

8. Summary of Requests for Facilities-Related Projects
89th Regular Session, Agency Submission, Version 1

Agency Code: 754		Agency: Texas State University		Prepared by: Cristine Black											
Date: 08.16.24		Project Category				Amount Requested									
Project ID #	Capital Expenditure Category	Project Description	New Construction	Health and Safety	Deferred Maintenance	Maintenance	2026-27 Total Amount Requested	MOF Code #	MOF Requested	Can this project be partially funded?	Requested in Prior Session?	Value of Existing Capital Projects	2026-27 Estimated Debt Service (If Applicable)	Debt Service MOF Code #	Debt Service MOF Requested
1	Construction of Buildings and Facilities	The existing Chemistry building was constructed in 1983 as a new Science Building to house various departments. Over the years the building has been modified to accommodate labs to fulfill the needs of Chemistry, however, the existing building systems cannot support the modern academic and research environment. The new 220,000 GSF Chemistry building will provide space for the Department of Chemistry, with configurable research laboratories, teaching labs, large classrooms, space for faculty, graduate student offices, collaboration and study space.	\$ 226,800,000				\$ 100,000,000	001	CCAP Bond	Yes	No		\$ 17,440,000	001	GR
2	Construction of Buildings and Facilities	In 2023, Texas State University created an ambitious seven-year plan to bring 10,000 new students to the Round Rock Campus by 2030 and to reach the goal of becoming the third largest university campus in the Austin Metropolitan area. To do so a collaboration with Austin Community College has been initiated, new undergraduate degree programs have been added, and a general education curriculum will be introduced. This project will construct a new 135,000 GSF multi-purpose building housing general classrooms, student support space, offices, meeting space and dining options for faculty, staff and students.	\$ 110,000,000				\$ 70,000,000	001	CCAP Bond	Yes	No		\$ 12,210,000	001	GR

Gross Square Feet: 220,000	Net Assignable Square Feet in Project 132,000			

Project Description

The existing Chemistry Building was constructed in 1983 as a new Science Building to house various departments. Over the years the building has been modified to accommodate labs to fulfill the needs of Chemistry, however, the existing building systems cannot support the modern academic and research environment. The new 220,000 GSF Chemistry Building will provide space for the Department of Chemistry, with configurable research laboratories, teaching labs, large classrooms, space for faculty, graduate student offices, collaboration and study space.

Agency 754 Texas State University

Project Priority:	Project Code:	Capital Construction Assistance Projects Revenue Bond Request	Total Project Cost	Cost Per Total Gross Square Feet
2	2	\$ 70,000,000	\$ 110,000,000	\$ 815

Project Description

In 2023, Texas State University created an ambitious seven-year plan to bring Round Rock enrollment to 10,000 students by 2030 and to reach the goal of becoming the third largest university campus in the Austin Metropolitan area. To do so, a collaboration with Austin Community College has been initiated, new undergraduate degree programs have been added, and a general education curriculum will be introduced. This project will construct a new 135,000 GSF multi-purpose building housing general classrooms, student support space, offices, meeting space and dining options for faculty, staff and students.

Advanced Law Enforcement Rapid Response Training (ALERRT)

(1) Year Non-Formula Support Item First Funded:	2020
Year Non-Formula Support Item Established:	2002
Original Appropriation:	\$2,000,000

(2) Mission:

In response to the tragic event at Robb Elementary School, Governor Greg Abbott instructed Executive Director Dr. Pete Blair to begin providing Texas State University's nationally recognized Advanced Law Enforcement Rapid Response Training (ALERRT) programs to all school districts across the state, prioritizing school-based law enforcement.

The tragedy in Uvalde reinforces the need for police officers to receive high-quality and frequent training if responding officers are going to perform well in a crisis. While the State of Texas has funded ALERRT to provide high-quality response training for some time, such training is not currently required in the State of Texas. Several other states have mandated ALERRT training in their training academies (e.g., Oklahoma, Virginia), and ALERRT has been recognized as the national standard for active shooter response training by the FBI.

This request includes a multi-pronged approach to improve the ability of Texas Peace Officers to respond to critical incidents.

(3) (a) Major Accomplishments to Date:

Since 2002, The ALERRT Center at Texas State University has been awarded more than \$155 million in state and federal funding and has trained more than 291,509 law enforcement and fire officials nationwide in dynamic, force-on-force scenario-based training. We have also trained more than 910,019 civilians in our Civilian Response to Active Shooter Events (CRASE) and Avoid-Deny-Defend awareness program.

The State of Texas has mandated our training to all law enforcement officers along with the requirement of continual recertification making this an ongoing effort.

We have partnered with the Department of Public Safety (DPS) to ensure all regions within the State of Texas have access to our training. This accomplishment has made a significant contribution to public safety by equipping peace officers with the skills and knowledge necessary to respond efficiently and effectively in high-stress situations, ultimately enhancing the safety and security of our communities.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

In addition to the courses we will deliver, we are partnering with the National Association of School Resource Officers (NASRO) to create a course specific to educational environments. This innovative program integrates NASRO's extensive expertise in school-based safety with our advanced training and research. The course will be designed to address the unique challenges and dynamics present in school settings, ensuring that school resource officers (SROs) and other educational staff are fully prepared to respond to critical incidents effectively.

754 Texas State University

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

Established in 2002, the program has been grant and state funded through August 2024.

(5) Formula Funding:

This Non-Formula Support item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis.

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

2024-25 Biennium:

Indirect Account (Texas State University) : \$500,000

Operating Account (Texas State University) : \$175,000

COPS Award (DOJ) : \$10,000,000

DHS/FEMA : \$2,750,000

FBI : \$150,000

2026-27 Biennium Projections: Indirect Account (Texas State University) : \$500,000

Operating Account (Texas State University) : \$175,000

COPS Award (DOJ) : \$12,000,000

DHS/FEMA : \$2,750,000

FBI : \$150,000

(9) Impact of Not Funding:

ALERRT will continue to serve the needs of the Texas and national law enforcement community through grant funding as much as possible. ALERRT does not charge departments for this training. This is a critical part of our success and it underscores that local budgets should not be the determining factor in accessing life-saving training. However, this approach does mean that ALERRT's ability to provide training is directly tied to available funding. As the national demand for training on ALERRT continues to increase, and our current grant funding remains flat, our ability to serve the needs of Texans is constrained by other states' needs. This exceptional item request will provide funding that can be targeted to serve the State of Texas and deliver the required training as mandated.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuation:

This Non-Formula Support Item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis for continued operation.

754 Texas State University

(11) Non-Formula Support Associated with Time Frame:

N/A, ongoing permanent support is being requested.

(12) Benchmarks:

N/A, this Non-Formula Support Item requires on-going support.

(13) Performance Reviews:

1. Number of training classes conducted
 2. Number of students trained
 3. Student performance in classes – Pre/Post test
 4. Student evaluations of classes
 5. New active shooter/police tactical knowledge trainings and products produced
 6. Performance of trained agencies that experience attacks
-

754 Texas State University

Ctr. for Health and Econ. Resiliency [CHERR]

(1) Year Non-Formula Support Item First Funded:	2022
Year Non-Formula Support Item Established:	2016
Original Appropriation:	\$2,550,000

(2) Mission:

The Community Health and Economic Resiliency Research Center of Excellence (CHERR) is a statewide hub for evidence and programs to ensure the health and economic vitality of Texas. Through innovative partnerships that engage businesses, universities, healthcare organizations, and community leaders, this center facilitates applied resilience research and educational programs that help Texans plan, adapt, and recover from public health emergencies and natural disasters.

(3) (a) Major Accomplishments to Date:

- Established 34 innovative applied research partnerships among Texas State faculty researchers and leaders from Texas healthcare, business, and public health organizations
- Developed three evidence-based credentialing programs for the Texas workforce, and a platform to deliver virtual learning programs and teach data analytics, visualization, mental healthcare management, and small business resilience planning
- Led a comprehensive natural disaster and recovery planning process in East, Central, and North Texas, integrating evidence-based strategies to enhance community readiness
- Provided experiential learning and marketable skill development opportunities through strategic partnerships with the Texas Association of Community Colleges, Texas State Library and Archive Commission, and research centers in the TSUS, UT, and TAMU Systems
- Assessed data analytics and AI in a tabletop disaster resilience simulation model, community mental health data monitoring program, and AI-powered fire safety robotics tool
- Worked with health and bioscience industry leaders, public health and emergency managers, and entrepreneurs in Texas on R & D programs for health and economic vitality.
- Launched public-private partnerships for sustainable agriculture research leading to a new product for resilient soil and livestock; sponsored MBA capstone students to establish business and marketing plans
- Conducted digital healthcare transformation research for rural counties in the state

(3) (b) Major Accomplishments Expected During the Next 2 Years:

754 Texas State University

- Expand our statewide virtual learning and research networks to support healthcare, nursing, and mental health workforce needs
- Create and assess evidence-based credentialing programs and/or apprenticeship program to provide GIS mapping education and training opportunities to the healthcare workforce and partnerships with TSUS institutions, healthcare organizations, and community leaders
- Develop a clinical research coordinator credential to expand professional support for clinical trials in rural and under-served communities
- Develop and test an evidence-based mobile application and virtual suicide prevention program for veterans in Texas
- Expand strategic partnerships for natural disaster simulation and healthcare planning
- Launch new research partnerships with TSUS institutions to expand healthcare workforce research and planning
- Assess the effectiveness of data analytics, AI, and robotics tools to increase public health and safety
- Forge new collaborations with health and bioscience industry leaders, public health and emergency managers, and entrepreneurs in Texas on R & D programs for health and economic vitality
- Expand sustainable agriculture regeneration research and product development with Texas entrepreneurs, business incubators, farmers and ranchers

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

None

(5) Formula Funding:

This Non-Formula Support item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis.

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

The Community Health and Economic Resilience Research (CHERR) Center of Excellence does not have any non-general revenue sources to sustain the Center's resilience research programs. Individual investigators and businesses affiliated with the Center of Excellence have external revenue sources that are not shared or available to fund the Center of Excellence.

(9) Impact of Not Funding:

754 Texas State University

Although the term resilience might be used often in multiple contexts, few research programs or centers link resilience directly with the healthcare systems, economic climate, and workforce needed to make community-level health and economic resilience possible. The Center of Excellence for Community Health and Economic Resilience Research at Texas State University plays a crucial role in addressing this gap by providing valuable research and programs to foster integrative health and economic resilience in Texas.

Failing to fund this Center would result in a significant deficit of solutions to increase statewide health and economic resilience using evidence from research, workforce development programs, and new technologies. Crucial partnerships involving state and local business and community health leaders would also be lacking, which could ultimately hinder collaborations for public health emergency planning.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

This Non-Formula Support Item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis for continued operation.

(11) Non-Formula Support Associated with Time Frame:

N/A, ongoing permanent support is being requested.

(12) Benchmarks:

N/A, this Non-Formula Support Item requires on-going support.

(13) Performance Reviews:

Performance Review for the Community Health and Economic Resilience Research Center or Excellence will assess the following:

- Number of researchers and research institutions collaborating with the Center of Excellence to provide essential new knowledge addressing key social, economic, and environmental issues related to resiliency among individuals and communities in Texas.
 - Number of students and community members who receive education and training on marketable skills needed to foster health and economic resilience in Texas.
 - Number of community and state associations, healthcare systems, public health centers, business and economic development organizations, and state agencies that collaborate with the Center of Excellence to advance health and economic resilience research and programming.
 - Number of news stories, webinars, academic and community presentations, videos, workshops, and meetings conducted by the Center of Excellence to foster health and economic resilience in Texas.
-

754 Texas State University

E.I. Advanced Law Enforcement Rapid Response Training (ALERRT)

(1) Year Non-Formula Support Item First Funded:	2020
Year Non-Formula Support Item Established:	2002
Original Appropriation:	\$2,000,000

(2) Mission:

The purpose of this funding would be to create adequate space for the continued growth of the ALERRT Center, and to secure the 75 acres of federal land we are about to be given. This will allow us to continue to upgrade and provide the best research-based active attack training to each peace officer within the State of Texas.

(3) (a) Major Accomplishments to Date:

Since 2002, The ALERRT Center has trained more than 291,509 law enforcement and fire officials nationwide in dynamic, force-on-force scenario-based training. ALERRT has also trained more than 910,019 civilians in our Civilian Response to Active Shooter Events (CRASE) and Avoid-Deny-Defend awareness program. The State of Texas has mandated our training to all law enforcement officers along with the requirement of continual recertification making this an ongoing effort.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Successfully training all certified law enforcement throughout the state. Looking to expand our facilities to improve upon our scenario-based training that is provided to all law enforcement. By doing so, this will provide our first responders with the tools and resources needed to effectively respond to such events.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

The ALERRT Center is both state and federally funded.

(5) Formula Funding:

This Non-Formula Support item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis.

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

The ALERRT Center receives funding from the State of Texas Appropriation, the U.S. Department of Justice Community Oriented Policing Services (COPS) Office, the Department of Homeland Security, and the Federal Bureau of Investigation (FBI). We anticipate these same funding sources but with increased amounts.

754 Texas State University

(9) Impact of Not Funding:

The ALERRT Center would attempt to continue to serve the needs of the Texas and national law enforcement community with our current means at a lower efficient rate. ALERRT does not charge for our training. This is a critical part of our success and it underscores that local budgets should not be the determining factor in accessing life-saving training. However, this approach does not mean that ALERRT's ability to provide training is directly tied to our available funding. As demands for our training increase, along with our internal growth and evolving training, our ability to serve the needs of Texans becomes constrained. This request will provide the funding necessary to improve our ability to serve Texas peace officers.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

This Non-Formula Support Item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis for continued operation.

(11) Non-Formula Support Associated with Time Frame:

NA, ongoing permanent support is being requested.

(12) Benchmarks:

NA, this Non-Formula Support Item requires on-going support.

(13) Performance Reviews:

1. Scope of Work as it relates to the tasks to be completed as agreed upon.
 2. Timeline
 3. Budget
 4. Quality of Work
 5. Number of Texas first-responders trained
 6. Number of national Texas first-responders trained
-

754 Texas State University

E.I. Equity Funding

(1) Year Non-Formula Support Item First Funded:	2006
Year Non-Formula Support Item Established:	2006
Original Appropriation:	\$1,543,773

(2) Mission:

TXST receives less state support per student than most universities in Texas. We currently rank 35th in this measure out of the 37 general academic institutions in Texas. This additional funding would put us near the average amount of funding provided by the state to our peer institutions on a per-student basis and ensure our ability to recruit highly qualified faculty & staff to produce and support competitive programs that transcend existing disciplines and boundaries to create & apply new knowledge.

The State of Texas is at the forefront of innovation, discovery, & entrepreneurial activities around the globe. One driver of the innovation ecosystem we have built in Texas is the support the state has provided to higher education. TXST is a striking example of the success of that support. We are focused on instruction & research that has practical value and real-life applications that can change the world. Our faculty & students are generating new knowledge, catalyzing ideas into reality, and pushing the boundaries in every discipline.

These funds will advance our student-centered mission to serve the educational needs of the diverse population of Texas and the world beyond. We will do this by integrating instruction & research. TXST focuses its efforts on priorities that emerge from our mission & strengths, that advance academic & industry needs, that meet state & national economic & employment needs, and that encourage cross-disciplinary collaboration and innovation.

(3) (a) Major Accomplishments to Date:

TXST's Carnegie Classification reached its current classification as an R2 doctoral university with high research activity in 2018. We anticipate achieving R1 status in 2027.

TXST has set freshmen enrollment records for 10 out of the last 11 years and will reach 8,000 freshmen for the first time in Fall 2024.

We have set institutional records for Research and Development expense 15 years in a row.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

- 1) Achieving R1 status
- 2) 8,000 freshmen class
- 3) Freshman class of high academic achievement (at least 50% of first-time entering freshmen in top 25% of high school class)
- 4) Recognition of research capabilities and scholarly attainment (Association of Research Library membership, Phi Beta Kappa Chapter, or Phi Kappa Phi Chapter)
- 5) High-quality faculty (5-7 faculty with various international and nationally recognized awards)
- 6) High-quality graduate education (reflected in the number of programs and graduation rates)

754 Texas State University

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

Established in 2006, this item subsumed former non-formula support items that are no longer active.

(5) Formula Funding:

Institutional enhancement is not eligible for formula funding, and as a result, non-formula support is needed on an permanent basis for continued operation.

(6) Category:

Instructional Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

The university actively searches and pursues funding from all available sources in support of the mission, vision, and goals of Texas State University.

(9) Impact of Not Funding:

This funding is critical to ongoing development and delivery of our programs. Institutional Enhancement funding has been a consistent funding mechanism that supports the institution's ability to provide a quality educational experience to a growing student body. Elimination of this funding source would create shortfalls in numerous academic, research, and student support areas that may adversely affect graduation rates and student success.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Institutional enhancement is not eligible for formula funding, and as a result, non-formula support is needed on an permanent basis for continued operation.

(11) Non-Formula Support Associated with Time Frame:

N/A, request is for ongoing permanent support.

(12) Benchmarks:

NA

(13) Performance Reviews:

Performance will be measured using the Texas Higher Education Coordinating Board's Building a Talent Strong Texas strategic plan metrics.

754 Texas State University

E.I. Round Rock Higher Education

(1) Year Non-Formula Support Item First Funded:	1996
Year Non-Formula Support Item Established:	1996
Original Appropriation:	\$400,000

(2) Mission:

The Round Rock Campus (RRC) provides exceptional academic programs, student academic support services, and training opportunities to students and the community in Round Rock, north Austin, and Williamson county and surrounding counties. To accomplish these goals, the RRC expands on the quality instruction provided by our faculty by providing:

- exceptional academic programs that utilize a variety of instructional delivery methods,
- efficient and effective student academic support services,
- career training responsive to community needs,
- informative and creative lectures and community events, and
- courteous, top-quality customer service to faculty, students and guests.

(3) (a) Major Accomplishments to Date:

Increased enrollment by 7% from Fall 2023-Spring 2024.
Graduated approximately 200 students into high-demand healthcare fields.
Won the Round Rock Chamber of Commerce Business of the Year award 2023-24.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

A 20% increase in the number of students served at the RR Campus.
Community partnerships including a Life Sciences Incubator facility and ecosystem. Increased partnerships with industry for research and real-world problem solving.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

The MITC (Round Rock) was a new initiative created in 1998 with funding of \$400,000. Prior to receiving this funding, part-time staff members were supported by Texas State University.

(5) Formula Funding:

This Non-Formula Support item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis.

(6) Category:

Instructional Support

(7) Transitional Funding:

N

754 Texas State University

(8) Non-General Revenue Sources of Funding:

The RRC generates small amounts of auxiliary service revenues from events and workshops provided for external users.

FY22 Aux Revenue: \$53,891

FY23 Aux Revenue: \$59,222

FY24 Aux Revenue: \$60,000

FY25 Aux Revenue: \$60,000

FY26 Aux Revenue: \$60,000

FY27 Aux Revenue: \$60,000

(9) Impact of Not Funding:

Reduced capacity to serve the educational and workforce needs of the population growth in Central Texas.

Less graduates ready to enter into high-demand, high-growth industries.

Less appealing for industries to locate in the region.

Less appealing for community partnerships and engagement which increase the livability and success of the region.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

This Non-Formula Support Item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis for continued operation.

(11) Non-Formula Support Associated with Time Frame:

This Non-Formula Support Item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis for continued operation.

(12) Benchmarks:

NA, this Non-Formula Support Item requires on-going support.

(13) Performance Reviews:

Personnel are evaluated annually by their supervisors to ensure they are meeting operational and educational goals.

Faculty members are evaluated annually by their supervisor and via student feedback.

754 Texas State University

E.I. STEM Pedestrian Bridge

(1) Year Non-Formula Support Item First Funded:	2026
Year Non-Formula Support Item Established:	2026
Original Appropriation:	\$4,000,000

(2) Mission:

A safe and long-term connection across Comanche Street connecting the campus from east to west. The bridge will also serve future facilities anticipated by the 2025-2035 Master Plan, which adds the possibility of a Chemistry Building as part of the STEM neighborhood. The Master Plan also predicts a parking garage near the STEM neighborhood, which will also benefit from a safe pathway across North Comanche Street that crosses the middle of campus.

(3) (a) Major Accomplishments to Date:

NA

(3) (b) Major Accomplishments Expected During the Next 2 Years:

With the new STEM building under construction, the pedestrian entrances to all facilities in this neighborhood will be served by the new pedestrian bridge from the main spine through the campus. The bridge will add a safe and efficient route for all students, faculty, and staff serving this area. Students and faculty will realize more efficient pathways to other services, including parking, food service, and other buildings within the core of campus. Neighboring facilities, such as the McCoy College of Business, LBJ Student Center, and the Health Professions Buildings, will be served better by this bridge which also provides a safe connection to Residence Halls and Dining centers.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

NA

(5) Formula Funding:

This Non-Formula Support item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis.

(6) Category:

Research Support

(7) Transitional Funding:

Y

(8) Non-General Revenue Sources of Funding:

NA

754 Texas State University

(9) Impact of Not Funding:

Increased risk for pedestrian safety as the road that the overpass would be over is a heavy traffic thoroughfare for campus and will be increasing as the new buildings within the STEM neighborhood are constructed and opened.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

NA, Transitional Funding

(11) Non-Formula Support Associated with Time Frame:

Yes, September 2026 - August 2028.

(12) Benchmarks:

754 Texas State University

E.I. Texas School Safety Center

(1) Year Non-Formula Support Item First Funded:	2007
Year Non-Formula Support Item Established:	1999
Original Appropriation:	\$3,000,000

(2) Mission:

The mission of the Texas School Safety Center (TxSSC) is to serve schools and communities to create safe, secure, and healthy environments. The TxSSC is housed at Texas State University and was established in 1999 following the tragic Columbine school shooting. The TxSSC is legislatively charged to serve as the central clearinghouse for the dissemination of safety and security information, including training, technical assistance, and research for K-12 schools, charter schools, and junior colleges throughout the state of Texas. The TxSSC provides training on a variety of topics such as emergency operations planning, drilling and exercising, the school safety and security audit process, school behavioral threat assessment, and specialized training for school-based law enforcement officers. In addition, the TxSSC is charged with developing model safety and security audit procedures for school districts and collecting results of the safety and security audits from school districts. The TxSSC also oversees the annual review of district Multi-Hazard Emergency Operations Plans (EOPs). Further, the TxSSC oversees and maintains the Texas Safety and Security Consultant Registry and publishes the state-mandated Sheriff school safety meeting reports. The TxSSC is a leading entity in supporting safe and healthy schools in Texas and is relied upon for assistance and guidance throughout the nation.

(3) (a) Major Accomplishments to Date:

- 1) Developed statewide school safety training program that covers topics such as EOPs in schools, school behavioral threat assessment, safety and security facility audits, school-based policing, drilling/exercising, digital safety, bullying, and cyberbullying prevention.
- 2) Developed annual statewide Multi-Hazard Emergency Operations Plan (EOP) review processes for all Texas school districts and community colleges to ensure compliance with the Texas Education Code. Developed a customized software platform to manage annual EOP reviews systematically and efficiently.
- 3) Deployed Texas School Safety and Security Consultant Registry per the Texas Education Code.
- 4) Developed a model school safety and security audit process for Texas school districts and community colleges to inform strengths and gaps in school safety and have published corresponding reports per the Texas Education Code.
- 5) Assisted TEA in the development of the statewide evaluation rubric for the annual District Vulnerability Assessments.
- 6) Developed and completed the first year of the Intruder Detection Audit program at the request of the Governor's Office, and assisted TEA with the successful transition of the program to oversee as the monitoring agency for LEAs.
- 7) Engaged in research activity to inform training and guidance
- 8) Designed and developed a full-featured website, and regularly publishes resources and toolkits via this platform. Launched The Learning Lab School Safety Podcast.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

754 Texas State University

- 1) Deliver statewide school safety training programs in topic areas such as EOPs in schools, school behavioral threat assessment, safety and security facility audits, school-based policing, drilling/exercising, youth preparedness, digital safety, and bullying and cyberbullying prevention. Host 2 statewide Texas School Safety Conferences and a junior community college summit.
- 2) Continue to develop and disseminate resources that comprehensively address prevention, mitigation, preparedness, response, and recovery for multi-hazard events.
- 3) Deploy a School Behavioral Threat Assessment Manual to assist Texas school districts with operationalizing the threat assessment process with fidelity.
- 4) Conduct research and disseminate findings through technical reports, practitioner guides, academic publications, and training to further inform the field of school safety.
- 5) Conduct annual reviews and verification of Multi-hazard EOPs and execute all legislatively prescribed mandates.
- 6) Oversee the review and verification of the Texas School Safety and Consultant Registry.
- 7) Conduct regional tabletop exercises with school districts to enhance preparedness planning.
- 8) Provide daily technical assistance to Texas schools.
- 9) Develop Texas School Safety Teen Ambassadors statewide program focused on engaging middle/high school students in school safety initiatives.
- 10) Collaborate with statewide partners to leverage resources and promote school safety in Texas.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

FY07 - Office of the Governor, Criminal Justice Division \$450,000

FY07 - Texas Education Agency \$200,000

(5) Formula Funding:

This Non-Formula Support item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis.

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

The Texas School Safety Center generates income from registration fees collected for the annual Texas School Safety (TSS) Conference held in June each year.

Current and projected amounts are listed below:

FY24 – Program Income \$786,550

FY25 – Projected Program Income \$630,000

FY26 – Projected Program Income \$630,000

FY27 – Projected Program Income \$630,000

(9) Impact of Not Funding:

754 Texas State University

Every day schools face challenges that could impact the learning for students. These challenges range from natural disasters and mass violence to more frequent safety issues. Consequently, schools must ensure they take a multi-hazard approach to school safety and know how to prevent, mitigate, prepare for, respond to, and recover from any type of emergency that may arise. Failing to fund this item would result in a significant deficiency in our state's educational system, hindering the provision of a research-driven clearinghouse of school safety resources aligned with state and national standards. It is well known that students who do not feel safe and secure in school will not be academically successful. TxSSC provides a critical public safety service to our educational system by delivering training, developing resources, and engaging in research with relevance to inform the field of school safety. The implications of not funding this special item would be a loss of targeted school safety training/resources, research, and technical assistance that will impact the safety of over 5.3 million students in public schools. TxSSC should continue to serve as the lead entity to assist schools across Texas in developing, implementing, and sustaining a comprehensive school safety program that saves lives and property, improves school climate, and encourages an optimal learning environment for students. TxSSC is a proven leader in school safety not just in Texas, but nationwide.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

This Non-Formula Support Item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis for continued operation.

(11) Non-Formula Support Associated with Time Frame:

NA, ongoing permanent support is being requested.

(12) Benchmarks:

NA, this Non-Formula Support Item requires on-going support.

(13) Performance Reviews:

- 1) Conduct research/identify best practices in the field of school safety to inform statewide training and resources for Texas school districts, charter schools, and junior colleges.
 - 2) Develop/deliver research-based training curricula to address prevention, mitigation, preparedness, response, and recovery pertaining to school safety in areas such as school violence, EOPs, drilling/exercising, school behavioral threat assessment, safety and security audits, mental health, and digital safety.
 - 3) Develop/disseminate, via the TxSSC website, research-based on-line toolkits and guidance for school districts, charter schools, and junior colleges.
 - 4) Oversee the annual statewide review of multi-hazard EOPs for school districts, charter schools, and junior colleges, as well as the review and verification of the Safety and Security Consultant Registry.
 - 5) Provide specialized training for school-based law enforcement in Texas.
 - 6) Collect and analyze statewide school safety audit data that can be disseminated to stakeholders such as the Governor's Office, Texas Legislature, TEA, school districts, and community colleges.
 - 7) Conduct annual statewide needs assessments of Texas stakeholders to identify areas of need and inform strategic planning.
 - 8) Establish evaluation measures to assess the quality and utility of training to identify areas for improvement and future research.
-

754 Texas State University

E.I. Texas State Student Success Center

(1) Year Non-Formula Support Item First Funded:	2026
Year Non-Formula Support Item Established:	2026
Original Appropriation:	\$2,000,000

(2) Mission:

TXST has set a university goal to aggressively raise retention, graduation rates and create more credentialed students. Our goal is to provide a pathway for all students to graduate within 4 years, lowering cost and student debt, with a career that matches the skills provided by their major. TXST will need to focus on identifying and overcoming barriers to improve completion rates. To meet these goals requires a collaborative and analytical approach for tracking student performance and assessing the impact of academic, financial, socio-emotional, and co-curricular interventions. The Student Success Ctr (SSC) will be dedicated to the consolidation and interpretation of existing data and research on college completion and post-college success, while implementing the latest in student success innovations at a scale which will accelerate time to degree, lower costs, and ensure career readiness.

With over 40% of our students classified as first-generation, 30% as transfer students, and over 30% as Pell-eligible, TXST is a leader in social mobility and student access and was ranked #38 in the nation in 2023 for social mobility by researchers at Ed Reform Now. TXST is uniquely positioned to assist students with their success and serve as an incubator for innovative, evidence-based practices to increase degree-attainment, enrollment, persistence, and career readiness. The SSC will not only serve as a hub for student achievement but will share & broadcast our work to the State.

(3) (a) Major Accomplishments to Date:

Implementation of student impact platform EAB Navigate: provide real-time analytics and workflow solutions to support the entire student experience and achieve equitable student success outcomes. In the summer of 2024, Texas State was able to complete the onboarding of the EAB platform.

This is in addition to the development of a Division of Student Success and the appointment of a new Associate Vice President for Student Success. This reorganization will align with updated university goals for one-year retention, four-year graduation, and six-year graduation.

There is also a unified effort to create improved pathways for students who transfer to Texas State. Be it enhanced 2+2 transfer articulation agreements like our newly adopted Bats to Cats agreement with Austin Community College or improving the review and acceptance of course credits speeding up time to degree.

Texas State has also reviewed and developed a course redesign process to address high DFW courses and improve passing rates. This is in addition to improving rates of early grade reporting for students so we can identify students who need additional support and are in danger of departure.

In 2024, Texas State was also awarded a Moody Foundation Grant to improve career pathways by matching students to degree affirming opportunities including internships and employer interactions starting in their first year.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

754 Texas State University

Through real-time data analytics and the adoption of research-based practices, the Student Success Center will be able to make retention, graduation, and career readiness gains at a scale that will be a national model for student intervention and achievement. We will accomplish this by federating student success efforts in one locale, creating a more efficient delivery of services.

Over the next two years we aim to achieve 85% one year retention, reduce the percentage of students who end their first year on academic probation and suspension, and decrease time to degree. We aim to accomplish this by:

Increasing the number of offerings for online tutoring and academic support to meet students where they are at and expanding the number of courses we maintain academic support for.

Our Bobcats Bounce Back has developed and it debuting an expanded academic warning system by utilizing predictive analytics and coordinating interventions that are both scalable and personalized learning plans.

The degree planner feature of EAB Navigate will allow students to complete full degree plans, adjust their plans for better results and time to degree, and communicate with their advisor for better results.

We are developing a predictive data lake that will allow for long term and predictive planning resulting in more efficient use of university and state resources with just in time interventions.

Adopting completion grants focused on speeding up time to degree and reducing departure.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

The Division of Student Success was established in 2023 as part of a reorganization by Texas State President Kelly Damphousse aligned with his strategic goal of Elevating Student Success.

(5) Formula Funding:

This Non-Formula Support item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis.

(6) Category:

Instructional Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Texas State University is constantly working to identify partners to assist with our student success efforts including philanthropic awards, corporate partnerships, and federal grants. In 2024, Texas State was awarded a Moody Foundation grant for \$600,000 over three years to support first-gen initiatives. Student Success has also been awarded \$1.325 million in 5 year grants to support first-gen initiatives, Bobcats Bounce Back student recovery, and peer educators. In 2023, the university

754 Texas State University

committed an additional \$1.6 million for student success efforts including funding for new staff, support staff for EAB Navigate, and investments in student success programming aimed at improving student outcomes.

(9) Impact of Not Funding:

Universities with the size and scope of Texas State University require a centralized effort to pool and expand critical resources and advance interventions at scale. In order to address gaps in college completion and post-graduation success, the Student Success Center will be the central scaffolding that support our campus efforts by connecting data and best practices and bringing together faculty, staff, and students from all corners of campus to a single location. This centralization will send a powerful message to the campus community of our singular focus on student achievement while creating avenues for efficiency which can ultimately lower costs and reduce barriers for student progress. Not funding the center will greatly complicate our efforts by maintaining older, less efficient systems.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

This Non-Formula Support Item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis for continued operation.

(11) Non-Formula Support Associated with Time Frame:

NA, ongoing permanent support is being requested.

(12) Benchmarks:

NA, this Non-Formula Support Item requires on-going support.

(13) Performance Reviews:

The proposed Student Success Center will assess the following performance goals on an annual basis:

- Increase and improve academic initiatives and programs focused on identifying and addressing student challenges towards academic success and providing interventions at scale.
 - Produce unique research that provides essential new knowledge on academic, career, financial, wellness, and economic factors related to student performance at institutions of higher education in Texas.
 - Disseminate knowledge via community-based workshops, communication channels, and through strategic partnerships with educational partners. Texas State will serve as a regional and national leader in student success and will host regional and statewide meetings and summits focused on student success in partnership with our higher education colleagues, employers, and state leadership.
 - Cultivate statewide agreements with higher education and non-profit student success partners to share best practices for increasing student success at institutions with varying student profiles and needs.
 - Publish research that focuses on identifying student barriers to academic success (e.g. academic preparedness) and research that could inform early effective interventions.
 - Increase student success measures at Texas State including matriculation, persistence, retention, academic achievement, career success, and timely graduation rates.
-

754 Texas State University

Edwards Aquifer Research Center

(1) Year Non-Formula Support Item First Funded:	1980
Year Non-Formula Support Item Established:	1980
Original Appropriation:	\$190,000

(2) Mission:

The mission of EARDC is to: 1) perform basic and applied research on, and disseminate information about, the Edwards Aquifer and regional water resources; 2) offer laboratory and technical services to public and private entities and support graduate research; 3) use data to provide educational services for schools and the public. The Center coordinates its activities with those of other water-related centers at Texas State and in Texas. The Center provides opportunities for students, interns, and volunteers to obtain work experience in the water resources field. We also provide jobs for many students and provide facilities for post-doctoral, graduate, and undergraduate research. Through our education program of field days and summer camps, we expose hundreds of K-12 students to in-depth experiences in aquatic sciences. The time they spend at EARDC allows them to gain insight into the college experience and may encourage them to seek future admission to Texas State. It is important that we have a citizenry informed about water resources, and our student-oriented programs promote this. The importance of having a working water laboratory that is always available to support research, classes, educational activities, and public cannot be overemphasized. Few universities have NELAC-certified laboratories that produce data accepted by state and federal agencies. EARDC provides important services to local and regional communities, scientists, and water providers.

(3) (a) Major Accomplishments to Date:

EARDC has supported researchers and students who study the aquifer and water resources in the region. It produces many publications and reports utilized by officials, researchers, and the public. EARDC produced one of the first accurate models for predicting spring flows, and we produce data that helps keep the public informed about aquifer conditions. The EARDC sponsors and cosponsors water- and groundwater biology-related meetings, which have had many attendees.

Our Aquatic Science summer camp and Aquatic Science Field Days programs provide a unique hands-on science camp experience for youth. Demand for overnight camps exceeds our capacity. We continue to pursue strategies to lower costs and facilitate attendance by local and underprivileged children. These programs have been tremendously successful and are educating local and regional children, and creating a positive image of Texas State University.

Over the past 5 years, we successfully started two major initiatives. The first is a concentrated effort to more fully describe and understand the biodiversity of the Edwards Aquifer and to build a digitally curated collection of specimens. The second is a statewide assessment of how groundwater influences how rivers respond to climate change. The resulting information is of tremendous value to resource managers, including State and Federal agencies.

More information about the Center can be viewed on our website: <http://www.eardc.txstate.edu>.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

754 Texas State University

We will continue to make progress in understanding the ecology and biology of the Edwards Aquifer and other TX aquifer systems, and how they can be managed to meet Federal and State requirements. Part of this work will include Conservation Status Assessment work for known species, describing new species, publication of results in reports and peer-reviewed literature, and support of graduate students in these research areas.

We will continue to provide hydrogeologic and groundwater biology information to stakeholders in Central Texas, and are involved with studies of many groundwater systems in central and western Texas. We have staff and students working in these areas both with and without external funding. Our analytical lab's NELAC certification, which is required for all laboratories supplying information to the TCEQ, will allow EARDC to continue providing the highest quality water testing services for local and regional drinking water providers and wastewater facilities, and private landowners. EARDC is a certified Drinking Water Laboratory associated with a University in Texas.

We will continue to include students in the Aquatic Resources MS and Aquatic Resources and Integrative Biology PhD programs at Texas State in our research programs and will continue supporting post-doctoral researchers. We will continue to provide information for the Science Committee of the EAA that is implementing the Edwards Aquifer Habitat Conservation Plan (EAHCP).

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

None.

(5) Formula Funding:

This Non-Formula Support item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis.

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

For FY24:

Income Generating Acct, est. \$290,000.00

Grant Activity:

- Trans Pecos, final 8-3438 \$20,867.88
- Kissing Tree 8-3430, est. \$47,000.00
- TPWD Digitization 8-4150, final \$32,144.84
- City of San Marcos 8-4042, est. \$61,793.05

Anticipated Out-Year Activity:

- Income Generating projections for FY25-FY27 is \$300,000 annually.

754 Texas State University

- Estimated grant activity for FY25-FY27 is \$200,000 annually.

The Non-Formula Support Item funding is used to leverage this funding.

(9) Impact of Not Funding:

Loss of funding will result in the inability to maintain the current level of services; particularly for educational outreach and support of student research activities. This would occur at a time when the demand for our services is increasing - especially for education and outreach about aquifer science, and research on the Edwards Aquifer and other karst aquifers in Texas. We would also have far fewer funds to leverage for matches with external funding. We try to increase external funding every year and Non-formula support funding helps us to continue these efforts. Conditions in the region mean that our services, information, and activities are in great demand and we need the requested funds to meet that demand. Our center is also a supporter of the Aquatic Resources MS and Aquatic Resources and Integrative Biology PhD programs at Texas State University.

We educate public & private school students in the area about surface- and ground-water resources and quality. This is important for the future decision-makers in the region - especially as demands on these resources are increasing.

Inflation and automatic salary increases have decreased our available funding most years, and recent funding reductions resulted in the loss of a staff position. The University has had to supplement our basic funding to keep the center operational.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

This Non-Formula Support Item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis for continued operation.

(11) Non-Formula Support Associated with Time Frame:

N/A, ongoing permanent support is being requested.

754 Texas State University

Forensic Anthropology Center

(1) Year Non-Formula Support Item First Funded:	2024
Year Non-Formula Support Item Established:	2024
Original Appropriation:	\$150,000

(2) Mission:

The mission of the Forensic Anthropology Center is to provide education and outreach, case management, and identification and repatriation services for unidentified deaths in Texas through Operation Identification (OpID). OpID is an initiative within the Forensic Anthropology Center at Texas State University with a mission to facilitate the identification and repatriation of unidentified human remains in rural counties without medical examiners. These counties, especially those near the Texas side of the Mexican border face overwhelming numbers of deaths per capita, creating chronic mass disasters in the Texas borderlands. Because these counties lack the resources to properly investigate unidentified persons' deaths, decedents are often buried in temporarily marked graves that are not kept track of in any centralized office. As a result, state-mandated investigative services, including the collection and submission of biometric postmortem data and entering case information into the National and Unidentified Missing Persons System (NamUs), often do not happen. OpID works to intercept these unidentified human remains prior to burial and provide legally compliant case management that concludes with identification, family notification, and repatriation. OpID also exhumes individuals who have not received state-mandated investigative services.

(3) (a) Major Accomplishments to Date:

To date, OpID has exhumed 264 individuals and provided state-mandated identification efforts to support Justices of the Peace (JPs) and local law enforcement overwhelmed with unidentified deaths. Additionally, OpID received 313 cases from 18 counties requiring assistance. Thus far, OpID has facilitated the identification of 157 individuals, of which 71% have been confirmed in the last two years. These decedents originated from 13 different countries of origin, including Mexico, Nicaragua, Venezuela, Ivory Coast, and Syria. Further, OpID has 35 individuals with ID hypotheses who are awaiting DNA confirmation or family notification. OpID has assisted with 157 repatriations with 66% occurring in the last two years. In collaboration with our many partners, OpID provides education and training to JPs for managing unidentified deaths through the Texas Justice Courts Training Center. We have conducted two in-person training courses and an online module available for all JPs to access in the near future. In March 2024, OpID personnel organized a "train-the-trainer" fingerprint workshop taught by the FBI's Disaster Victim Identification (DVI) Unit. By implementing alternative fingerprinting techniques for decomposing remains, OpID has been able to facilitate the identification of 21 individuals.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

OpID plans to expand our volunteer opportunities and professional development to a broader student body while providing education and outreach to border and border adjacent counties regarding best practices for investigating unidentified human remains. We will continue traveling to rural counties without medical examiners to assess local needs. We will conduct cemetery surveys to assess whether buried decedents need exhumation and identification services while bringing counties into legal compliance with current state-mandated laws. We will continue supporting JPs by accepting unidentified human remains cases from their jurisdiction(s) for case management and scientific analysis. We will continue providing overall case management including fingerprinting, DNA submission, NamUs entry, and anthropological analyses. We are currently expanding our networks and developing new collaborations with national and transnational governmental and scientific organizations to facilitate our mission. OpID is part of a working group dedicated to improving the accurate accounting, identification, and repatriation of deceased persons recovered in Texas. Lastly, we are beginning a collaboration with DNA Justice, a non-profit organization that uses investigative genetic genealogy to identify unidentified human remains.

754 Texas State University

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

ICRC. \$157,286.00. 2019-2023.

State of Texas, Local Border Security Program. Identification of Migrant Remains. \$453,384.00. 2017-2022.

Rachal Foundation, \$110,000. 2015-2017.

(5) Formula Funding:

This Non-Formula Support item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis.

(6) Category:

Public Service

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Centralizing and Increasing the Reporting, Identification, and Repatriation of Unidentified Migrants in Texas Border Counties. Federal Grant. Bureau of Justice Assistance – Missing and Unidentified Human Remains Program.

2024: \$333,663.00

2025: \$342,458.00

2026: \$0.00

2027: \$0.00

International Committee for the Red Cross (ICRC). Non-governmental funding. Exhumation and DNA submission of unidentified human remains in South Texas.

2024: \$16,000.00

2025: unknown

2026: unknown

2027: unknown

(9) Impact of Not Funding:

OpID is the only agency in Texas that works directly with counties to assess their individual needs and helps bring them into legal compliance regarding unidentified deaths. Without funding, OpID cannot continue helping the JPs, law enforcement, and other officials in border and border adjacent counties who continue to experience mass disasters, where the number of fatalities exceeds local capacity. Therefore, counties may return to burying remains without investigation into the identity of the individual leading to non-compliance with state laws. These counties often cannot afford autopsy and/or refrigerated storage. OpID's outreach indicates that once individuals are buried, no further investigation takes place. Therefore, the unidentified will slip through the cracks and administratively disappear, and families will not know the fate or whereabouts of their loved ones.

754 Texas State University

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

This Non-Formula Support Item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis for continued operation.

Original Appropriation:	\$2,850,000

(2) Mission:

MARC's primary purpose is to ensure Texas State has a culture of flexibility, responsiveness, and relevance in the delivery of its mission, accelerate the introduction of new platforms, and enable technologies encompassing a broad range of applications such as SMART infrastructure, autonomous vehicles, renewable energy systems, disease detection, medical devices, medical diagnostics, energy storage, drug development tools, next-generation sensors and wireless networks, MEMS and data analytics supporting new technologies. MARC provides a seamless environment integrating applied multidisciplinary academic research, industry-sponsored projects, and experiential learning opportunities for students addressing the creation of a sustainable talent pipeline. Access to specialized tools and expertise enables early and growth-stage companies to efficiently access otherwise costly instruments and equipment accelerating their market entry while providing faculty opportunities to interact and students to gain experience. The MARC leadership team provides added value through (1) objective evaluation of university capabilities and opportunities; (2) early vetting of commercialization proposals and (3) mentoring for early-stage firms associated with MARC activities increasing their potential for success.

(3) (a) Major Accomplishments to Date:

1. STAR Park leads the industry/TXST research collaborative initiatives. 19 companies provide \$1.6M in annual cash/in-kind support. Hosted two annual conferences (600+ attendees). Three major labs are operational + one being built: (1) Smart Networks Lab, (2) Smart Cities Lab, (3) Network Operations Center & Security Operations Center, (4) Smart & Sustainable Fire Station Lab (Dec 2024)
2. Advanced Prototyping Lab (APL) serviced 129 projects & 192 users since 2019 inception
3. Center for Innovation & Entrepreneurship manages IGNITE & DEEP Dive startup events (786 attendees), the New Ventures accelerator pitch competitions (250+ attendees / 95 teams) awarding 21 winning teams & launching 10 startups. Hosted 33 TXST research teams at SXSW Interactive
4. The Faculty Innovation Accelerator Program (FIAP) trained 26 teams (60 faculty, staff, & students)
5. Innovation pipeline: 29 invention disclosures & 31 patent applications/issued
6. Industry-sponsored research projects-50 resulting in \$5.6M in funding
7. 350+ STEM students & faculty trained through SRO facilities resulting in >24,000 utilization hours
8. STAR Park: student employment - 12 interns, 19 graduates; 91 employees & 12 companies
9. Makerspace: Industry-sponsored senior design projects involved 1834 STEM students
10. Engaged with 25+ regional, national & international economic development entities showcasing research/innovation strengths of faculty/students.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

754 Texas State University

1. Grow STAR Park collaborative initiative by 10-15% in industry engagement (resulting in increased funding cash/in-kind support), conduct industry/academic collaborative annual conferences in 24-25 & increase industry/academic participation by 10%
2. Develop pathways to manage the graduated funding support and sustain New Ventures, IGNITE, DEEP Dive, among other collaborative innovation initiatives involving faculty & students
3. Grow FIAP – (a) increase faculty and student team engagements, (b) initiate innovation seed funding (including prototyping/proof-of-concept) and (c) explore joining the NSF Southwest I-Corps Hub as a partner
4. Increase innovation pipeline through growth in invention disclosure & patent applications by up to 20% Explore new avenues for intellectual property licensing
5. Grow industry-sponsored research projects by 10%
6. Increase STEM student & faculty training/usage of SRO facilities by 10%
7. Increase & diversify funding sources for Makerspace to become the Hub for three engineering-specific centers of excellence to support research, teaching, and workforce development
8. Increase external engagements with economic development entities by 20% to attract collaboration opportunities & foster new research and entrepreneurial pursuits.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

Internal funding was used for pilot projects in student ventures and STAR Park. External grants were used to support limited improvements to facilities. IDC supported facilities maintenance.

(5) Formula Funding:

This Non-Formula Support item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis.

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Federal grants sponsored by NSF, ONR, DOD and other agencies [FY23= \$77,139, FY24 = \$87,304]

State grant from TxDOT [FY23= \$0, FY24 = \$317,769]

Private grants sponsored by First Solar, Hays County, the Albert and Margaret Alkek Foundation and other sponsors [FY23= \$114,983, FY24 = \$102,195]

Internal funds including startups, indirect cost returned, research support programs and departmental funds [FY23= \$93,848, FY24 = \$105,682]

Fee for service agreements with private industries and other higher education institutions such as Group1, Cerium Labs, and UT Austin [FY23= \$134,334, FY24 = \$121,912]

STAR One Incubator Program clients such as CleverArium, Ion Biosciences, Material Hybrid Manufacturing, Paratus Diagnostics and Quantum Materials Corporation [FY23= \$393,678, FY24 = \$309,926]

Endowments from the Nina Vaca Innovation & Entrepreneurship Award and Scott Emerson Health Innovation Award [FY23= \$2,000, FY24 = \$2,000]

In-kind contributions from the community and private industry including City of San Marcos, City of Kyle, KODE Labs, and Everynet [FY23= \$1,120,000, FY24 = \$1,200,000]

754 Texas State University

Membership contributions including Guadalupe Valley Electric Coop, Sertainty, and YMCA [FY23= \$65,000, FY24 = \$45,000]

We project non-general revenue from MARC-funded activities will increase by 10% in the next biennium.

(9) Impact of Not Funding:

MARC represents the only source of funding available to TXST to use for increasing collaboration with the university and with external sponsors while advancing its research and economic development mission. MARC has proven the value of: (1) developing campus-wide multidisciplinary research initiatives, which support acceleration towards designation as a National Research University, while enhancing collaborations with industry; (2) creation of a stable and responsive network of shared research tools independent of individual department or faculty research labs maximizing allocation of resources, while reducing cost by avoiding duplication; (3) development of an advanced prototyping center supporting faculty/students and small/medium- sized businesses; (4) creation of a dynamic innovation & entrepreneurship program as well as unique innovation funding program, which integrates with existing efforts, such as NSF I-Corps and MSEC, while directly supporting proof-of-concept, prototype development and new ventures involving university faculty/ staff/students; (5) increases student experiential learning through access to MARC funded facilities/tools; (6) increases measurable outcomes related to student placement with industry thereby supporting a sustainable talent pipeline; and (7) accelerates commercialization outcomes in terms of industry sponsored research, Senior Design projects, Intellectual property pipeline and growth in university affiliated industry engagement.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

This Non-Formula Support Item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis for continued operation.

(11) Non-Formula Support Associated with Time Frame:

N/A, ongoing permanent support is being requested.

(12) Benchmarks:

N/A, this Non-Formula Support Item requires on-going support

(13) Performance Reviews:

MARC provides five key components for creating a flexible, responsive & relevant platform: 1) an institutional mechanism for evaluating multidisciplinary research strengths & identifying strategies for launching new TXST initiatives; 2) integrated innovation & entrepreneurial programs in collaboration with the Office of Innovation, Commercialization & Engagement, CIE, NSF I-Corps & MSEC measured by participation levels & company launches; 3) advanced prototyping capabilities supporting new product design & commercialization; 4) enhanced technical support through management of core facilities available for collaborative industry use; 5) enhanced opportunities for student experiential learning. Outcomes to be measured: 1) identification of new campus-wide innovation initiative opportunities; 2) growth of memberships & funding for STAR Park collaborative initiative; 3) use of APL; 4) innovation & entrepreneurship programs effectiveness measured by participation rates & startups; 5) increased commercialization & collaboration success measured by IP pipeline growth, industry-sponsored research & Senior Design projects; 6) enhanced experiential learning opportunities for students measured by use of MARC supported facilities/tools, participation in Senior Design projects, placement of paid student internships & graduates hired by STAR Park firms; 7) number of university-affiliated industry engagements and startups resulting from entrepreneurship programs & STAR Park incubator.

754 Texas State University

Round Rock Higher Education Center

(1) Year Non-Formula Support Item First Funded:	1996
Year Non-Formula Support Item Established:	1996
Original Appropriation:	\$400,000

(2) Mission:

The mission of Texas State University's Round Rock Campus (RRC) is to meet the higher education and workforce training needs of north Austin and Williamson County. The RRC started as an evening program with about 75% of the students that were working adults during the day and attending classes on a part-time basis in the evenings. In 2010 the St. David's School of Nursing opened to undergraduate nursing students studying for the Bachelor of Science in Nursing (BSN) in a full-time program of study. In 2018, the programs of Communication Disorders, Physical Therapy, and Respiratory Care were relocated from the San Marcos Campus to the RRC. Students in the three programs included full-time undergraduate, graduate, and professional doctoral students. The Physical Therapy Clinic and the Speech-Language-Hearing Clinics opened as a community resource in 2018, in addition to the Ascension Seton Williamson Sleep Center at Texas State University. In 2021, the programs of Health Information, Management Information, and Radiation Therapy were relocated from the San Marcos Campus to the RRC offering undergraduate and graduate programs. In Fall 2024, 11 new academic programs in various disciplines were added to the Round Rock campus to expand educational opportunities within the region. In addition, a selection of general education courses are being taught so that students will be able to start and complete their degree at this campus.

(3) (a) Major Accomplishments to Date:

In 1998, the RRC began as an MITC in portable buildings at a local high school. The Avery Building was opened on the current permanent campus in 2005 offering eight undergraduate and graduate degree programs. Currently, there are twelve (12) bachelor programs, thirteen (13) master's programs, and two (2) doctorate programs. The St. David's School of Nursing opened in 2010 offering the Bachelor of Science in Nursing degree, followed by the implementation of three master's degrees in nursing, Family Nurse Practitioner, Leadership in Nursing Administration, and Psychiatric and Mental Health Nurse Practitioner Administration. In 2018, with the relocation of the programs of communication disorders, physical therapy, and respiratory care, degree offerings included undergraduate programs in communication disorders and respiratory care, graduate programs in communication disorders and respiratory care, and the professional doctorate in physical therapy. In 2021, with the relocation of the programs of health information management and radiation therapy, both undergraduate programs in health information management and radiation therapy, as well as the graduate program in health information management are now offered at RRC. In addition to the health programs, the RRC serves approximately 1,000 students enrolled in undergraduate and graduate programs in areas of technology, business, and public service.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Major accomplishments expected in the next two years are an exponential growth in enrollment as the RRC will admit incoming freshmen to new academic programs as well as serving more transfer students through the Bats to Cats program with the local community college. The new building, Esparanza Hall will allow additional larger class cohorts in health and non-health programs. The addition of a life-sciences incubator located on the RRC will encourage industry and education partnerships and innovation as well as pave the way for research opportunities for TXST faculty.

754 Texas State University

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

The MITC was a new initiative created in 1998 with the Special Item Funding of \$400,000. Prior to receiving this funding, part-time staff members were supported by Texas State University.

(5) Formula Funding:

This Non-Formula Support item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis.

(6) Category:

Instructional Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Round Rock receives approximately \$55,000 per year in income-generating activities earning income from conferences and workshops.

The majority of those funds come from the EMTS Academy. This is a fee-based Academy and its purpose is to prepare students for their paramedic certification.

Income-generating funds are consistently around \$55,000 per year and are anticipated to stay in that range for the upcoming biennium.

(9) Impact of Not Funding:

Staff positions funded by this special item are needed to provide administrative support to assist students pursuing their educational studies on the RRC. Lack of funding will result in reduced efficiency in campus operations and reduced services for the RRC students in support of student success, retention, and progression to graduation.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

This Non-Formula Support Item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis for continued operation.

(11) Non-Formula Support Associated with Time Frame:

N/A, ongoing permanent support is being requested.

(12) Benchmarks:

N/A, this Non-Formula Support Item requires on-going support.

(13) Performance Reviews:

Annual evaluations of staff performance are conducted in association with the institutional goals.

Higher Education Schedule 9: Non-Formula Support

89th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

754 Texas State University

754 Texas State University

School Safety Center

(1) Year Non-Formula Support Item First Funded:	2008
Year Non-Formula Support Item Established:	1999
Original Appropriation:	\$1,500,000

(2) Mission:

The mission of the Texas School Safety Center (TxSSC) is to serve schools and communities to create safe, secure, and healthy environments. The TxSSC is housed at Texas State University and was established in 1999 following the tragic Columbine school shooting. The TxSSC is legislatively charged to serve as the central clearinghouse for the dissemination of safety and security information, including training, technical assistance, and research for K-12 schools, charter schools, and junior colleges throughout the state of Texas. The TxSSC provides training on a variety of topics such as emergency operations planning, drilling and exercising, the school safety and security audit process, school behavioral threat assessment, and specialized training for school-based law enforcement officers. In addition, the TxSSC is charged with developing model safety and security audit procedures for school districts and collecting results of the safety and security audits from school districts. The TxSSC also oversees the annual review of district Multi-Hazard Emergency Operations Plans (EOPs). Further, the TxSSC oversees and maintains the Texas Safety and Security Consultant Registry and publishes the state-mandated Sheriff school safety meeting reports. The TxSSC is a leading entity in supporting safe and healthy schools in Texas and is relied upon for assistance and guidance throughout the nation.

(3) (a) Major Accomplishments to Date:

- 1) Developed statewide school safety training program that covers topics such as EOPs in schools, school behavioral threat assessment, safety and security facility audits, school-based policing, drilling/exercising, digital safety, bullying, and cyberbullying prevention.
- 2) Developed annual statewide Multi-Hazard Emergency Operations Plan (EOP) review processes for all Texas school districts and community colleges to ensure compliance with the Texas Education Code. Developed a customized software platform to manage annual EOP reviews systematically and efficiently.
- 3) Deployed Texas School Safety and Security Consultant Registry per the Texas Education Code.
- 4) Developed a model school safety and security audit process for Texas school districts and community colleges to inform strengths and gaps in school safety and have published corresponding reports per the Texas Education Code.
- 5) Assisted TEA in the development of the statewide evaluation rubric for the annual District Vulnerability Assessments.
- 6) Developed and completed the first year of the Intruder Detection Audit program at the request of the Governor's Office, and assisted TEA with the successful transition of the program to oversee as the monitoring agency for LEAs.
- 7) Engaged in research activity to inform training and guidance.
- 8) Designed and developed a full-featured website, and regularly publishes resources and toolkits via this platform. Launched The Learning Lab School Safety Podcast.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

754 Texas State University

- 1) Deliver statewide school safety training programs in topic areas such as EOPs in schools, school behavioral threat assessment, safety and security facility audits, school-based policing, drilling/exercising, youth preparedness, digital safety, and bullying and cyberbullying prevention. Host 2 statewide Texas School Safety Conferences and a junior community college summit.
- 2) Continue to develop and disseminate resources that comprehensively address prevention, mitigation, preparedness, response, and recovery for multi-hazard events.
- 3) Deploy a School Behavioral Threat Assessment Manual to assist Texas school districts with operationalizing the threat assessment process with fidelity.
- 4) Conduct research and disseminate findings through technical reports, practitioner guides, academic publications, and training to further inform the field of school safety.
- 5) Conduct annual reviews and verification of Multi-hazard EOPs and execute all legislatively prescribed mandates.
- 6) Oversee the review and verification of the Texas School Safety and Consultant Registry.
- 7) Conduct regional tabletop exercises with school districts to enhance preparedness planning.
- 8) Provide daily technical assistance to Texas schools.
- 9) Develop Texas School Safety Teen Ambassadors statewide program focused on engaging middle/high school students in school safety initiatives.
- 10) Collaborate with statewide partners to leverage resources and promote school safety in Texas.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

FY07 - Office of the Governor, Criminal Justice Division \$450,000

FY07 - Texas Education Agency \$200,000

(5) Formula Funding:

This Non-Formula Support item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis.

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

The Texas School Safety Center generates income from registration fees collected for the annual Texas School Safety (TSS) Conference held in June each year.

Current and projected amounts are listed below:

FY24 – Program Income \$786,550

FY25 – Projected Program Income \$630,000

FY26 – Projected Program Income \$630,000

FY27 – Projected Program Income \$630,000

(9) Impact of Not Funding:

754 Texas State University

Every day schools face challenges that could impact the learning for students. These challenges range from natural disasters and mass violence to more frequent safety issues. Consequently, schools must ensure they take a multi-hazard approach to school safety and know how to prevent, mitigate, prepare for, respond to, and recover from any type of emergency that may arise. Failing to fund this item would result in a significant deficiency in our state's educational system, hindering the provision of a research-driven clearinghouse of school safety resources aligned with state and national standards. It is well known that students who do not feel safe and secure in school will not be academically successful. TxSSC provides a critical public safety service to our educational system by delivering training, developing resources, and engaging in research with relevance to inform the field of school safety. The implications of not funding this special item would be a loss of targeted school safety training/resources, research, and technical assistance that will impact the safety of over 5.3 million students in public schools. TxSSC should continue to serve as the lead entity to assist schools across Texas in developing, implementing, and sustaining a comprehensive school safety program that saves lives and property, improves school climate, and encourages an optimal learning environment for students. TxSSC is a proven leader in school safety not just in Texas, but nationwide.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

This Non-Formula Support Item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis for continued operation.

(11) Non-Formula Support Associated with Time Frame:

N/A, ongoing permanent support is being requested.

(12) Benchmarks:

N/A, this Non-Formula Support Item requires on-going support.

(13) Performance Reviews:

- 1) Conduct research/identify best practices in the field of school safety to inform statewide training and resources for Texas school districts, charter schools, and junior colleges.
 - 2) Develop/deliver research-based training curricula to address prevention, mitigation, preparedness, response, and recovery pertaining to school safety in areas such as school violence, EOPs, drilling/exercising, school behavioral threat assessment, safety and security audits, mental health, and digital safety.
 - 3) Develop/disseminate, via the TxSSC website, research-based on-line toolkits and guidance for school districts, charter schools, and junior colleges.
 - 4) Oversee the annual statewide review of multi-hazard EOPs for school districts, charter schools, and junior colleges, as well as the review and verification of the Safety and Security Consultant Registry.
 - 5) Provide specialized training for school-based law enforcement in Texas.
 - 6) Collect and analyze statewide school safety audit data that can be disseminated to stakeholders such as the Governor's Office, Texas Legislature, TEA, school districts, and community colleges.
 - 7) Conduct annual statewide needs assessments of Texas stakeholders to identify areas of need and inform strategic planning.
 - 8) Establish evaluation measures to assess the quality and utility of training to identify areas for improvement and future research.

Small Business Development Center

(1) Year Non-Formula Support Item First Funded:	2003
Year Non-Formula Support Item Established:	2003
Original Appropriation:	\$108,696

(2) Mission:

To foster small business success by providing technical assistance through advising, training, and collaboration.

(3) (a) Major Accomplishments to Date:

Metrics earned this biennium for Texas State University Small Business Development Center:

Total Businesses Assisted - 1,100
 Business Starts - 50
 Business Expansions - 100
 Jobs Created - 600
 Jobs Retained - 600
 Jobs Supported - 1,200
 Capital Infusion - \$52M
 Number of Client Hours - 8,000
 Training Events - 272
 Training Attendees - 3,331

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Metrics to be earned next biennium for Texas State University Small Business Development Center:

Total Businesses Assisted - 880
 Business Starts - 64
 Business Expansions - 80
 Jobs Created - 480
 Jobs Retained - 480
 Jobs Supported - 960
 Capital Infusion - \$40M
 Number of Client Hours - 8,000
 Training Events - 220
 Training Attendees - 3,300

754 Texas State University

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

The original funding for this program included the use of both non-formula funding and federal funding.

(5) Formula Funding:

This Non-Formula Support item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis.

(6) Category:

Public Service

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Annual commitments for FY24-FY25:

- Small Business Development Center-UTSA is \$253,596
- Federal SBDC Match is \$381,600.

We anticipate matching funds to stay level in FY26-FY27 from both agencies.

(9) Impact of Not Funding:

Program will lose its federal match funding, and the economic impact generated through the support of the Small Business Development Center.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

This Non-Formula Support Item is not eligible for formula funding and as a result non-formula support is needed on a permanent basis for continued operation.

(11) Non-Formula Support Associated with Time Frame:

N/A, ongoing permanent support is being requested.

(12) Benchmarks:

N/A, this Non-Formula Support Item requires on-going support.

(13) Performance Reviews:

The program participates in onsite reviews conducted by the South-West Texas Border Network of SBDCs, the U.S. Small Business Administration, UTSA financial oversight office on an annual basis to measure the program performance in both metrics and financial management. Additionally, the program is reviewed by the ASBDC accreditation team every 5 years.
