

Program of Animal Care and Use ●●● Occupational Health and Safety Program

Healthcare Providers: The individual you are assessing has been listed on an Animal Use Protocol. You may consider this information, provided by the Principal Investigator responsible for the research covered by the protocol, to be an accurate description of the frequency and level of contact with the specified animal subjects and/or other potential zoonotic risks in the research environment.

Research Setting

Animal Source:

Semester	Protocol Number	Title / Description	Principal Investigator

1. Description of personnel contact with animal subjects and/or other potential zoonotic risks

No direct contact with living vertebrate animals but will

- Conduct procedures on unfixed animal tissues or bodily fluids
- Handle animal waste, used/contaminated bedding, substrate, food, aquarium water, or contaminated equipment
- Work in uncontrolled natural conditions, wildlife environment, or remote location; experience greater-than-normal physical stresses or higher-than-normal risk of exposure to zoonoses or other site-specific hazards. *(Provide more detail in #4 below)*

Will have direct contact with living vertebrate animals and will

- Handle, restrain, capture, or transport
- Administer chemical substances
- Conduct invasive procedures, collect and conduct procedures on unfixed tissue or bodily fluid samples
- Perform non-invasive sampling, tagging
- Handle animal waste, used/contaminated bedding, substrate, food, aquarium water, or contaminated equipment

2. Estimated frequency of contact during research period

- Daily (5-7x each week) Weekly (1-3x each week) Monthly (1-3x a month)

3. Animal Species

<p style="text-align: center;">Rabies Vectors?</p> <p>NO YES</p> <p>Bats Raccoons Skunks Foxes Coyotes Other <i>list</i> →</p>	<p style="text-align: center;">Venomous Species?</p> <p>NO YES</p> <p>Cottonmouths Copperheads Coral Snakes Rattlesnakes Other <i>list</i> →</p>	<p><i>Additional species, notes</i></p>
<p style="text-align: center;">Reptiles / Amphibians</p> <p>Snakes (non-venomous) Lizards, skinks, geckos Turtles Alligators Salamanders Frogs, toads Other <i>list</i> →</p>	<p style="text-align: center;">Mammals</p> <p>Shrews, moles Rabbits, hares Opossums Armadillos Ungulates <i>list if known</i> → Wild Rodents <i>list if known</i> → Carnivores <i>list if known</i> → Other <i>list</i> →</p>	<p><i>Additional species, notes</i></p>
<p style="text-align: center;">Birds</p> <p>List types, species, or common names</p>	<p style="text-align: center;">Fish</p> <p>List types, species, or common names. Specify freshwater or marine.</p>	<p><i>Additional species, notes</i></p>

4. Additional information relevant to assessment of potential risks to health or safety of protocol personnel.
