Charles Austin Drive closed  
from March 17 - March 21  
from 9pm to 5am only

**Vehicles in parking lots**  
R41, P8 and R14 will need to  
vacate by 9pm each night

### PROJECT OVERVIEW

LCRA Transmission Services Corporation is performing work to increase the reliability and capacity of the 1.2-mile San Marcos - Strahan 138-kV transmission line that crosses Interstate Highway 35 near State Highway 80.

The project will enhance system reliability by installing new conductor and transmission line structures to meet system capacity needs. Upgraded lines can help minimize outages, restoration times and restoration costs.

### WHAT TO EXPECT

Construction activity is beginning in October 2024. LCRA staff and contractors will work along the rights of way, and the project will require crews using large vehicles and equipment. Construction work will occur intermittently throughout the project, which is expected to be completed in May 2025. Weather conditions or other factors can cause the schedule to change.

Work will begin near the San Marcos Substation east of I-35, crossing over the interstate and moving northwest to the Strahan Substation adjacent to Aquarena Springs Drive. During the project, there will be occasional overnight work, and traffic may be affected intermittently. Traffic controls will be in place as needed.

Safety is our top priority, and we will work as quickly as possible. We appreciate your patience as we work to maintain safe and reliable transmission lines.

**LCRA TRANSMISSION SERVICES CORPORATION**

From March 17, 2025 thru March 21, 2025, LCRA Transmissions Services Corporation will be closing off a portion of parking lot P9. This closure includes 10 ADA parking spaces and one of the entrances into the lot. Work activities will occur between 9:00pm and 5:00am and Charles Austin Drive will be closed during this time. Due to the road closure, parking lots R41, P8 and R14 will need to be vacated by 9pm each night.
