[See more marketable skills for this major.](#)

## Experiences in Interior Design

The interior design major prepares students with the knowledge and skills needed for careers across all areas of the field, including residential and commercial interior design. The program is accredited by the Council for Interior Design Accreditation (CIDA), the recognized accrediting agency for the discipline in the United States and Canada. Students learn to develop and communicate design concepts, solve design challenges, and present solutions professionally. The curriculum covers essential topics, such as color theory, design history, hand and computer drafting, space planning, selection of interior finishes, building codes, and interior lighting. Graduates are academically prepared to take the NCIDQ (National Council for Interior Design Qualification) examination, which must be passed to register as an interior designer in Texas and many other states. Student organizations, scholarships, and internships are included in the program experience.
