Administrative services and facilities

Managers

Associate professor in agricultural education

Greenhouse operation manager

Agricultural sciences

Professor agricultural (horticulture)

Experiences in Agricultural Business and Management

The bachelor's degree with major in agriculture business and management prepares students to be competent in agribusiness management, agricultural marketing in domestic and international trade, food safety, sustainability, and agricultural & natural resource policy. Coursework ensures that students graduate with a well-grounded understanding of the agricultural industry and agribusiness landscape in six fields: production, consumption, economics, policy, environment, and international contexts. The department hosts strong experiential programming in research, service-learning and professional development, and students may participate in Education Abroad or Study in America for global and cultural enrichment, and as well as choose from numerous student organizations for engaging experiences.
