Product analyst

Artificial intelligence analyst

Machine learning analyst

### Experiences in Business Analytics

The business analytics major equips students with the skills needed to thrive in data-driven decision-making roles across diverse industries. The curriculum blends analytical techniques, data science, and business acumen to prepare students to transform data into actionable insights. Students gain a solid foundation in data analysis supported by coursework in business functions such as marketing, finance, operations, and management. The program emphasizes real-world application through hands-on projects and an internship program connects to department-approved employment settings. The student experience is further enriched by resources available through the McCoy College of Business.
