PROGRAM RIVALS OTHERS

"From my perspective, the Construction Science and Management Technology program at Texas State University rivals any construction program offered anywhere in Texas or the southwest."

Dr. Andy Batey, Former Chair, Engineering Technology

NATIONALLY ACCREDITED

"The Construction Science and Management Technology program at Texas State University is a nationally accredited program dedicated to educating the next generation of construction leaders who are well versed in the construction process, project management and cost control."

Dr. B.J. Spencer, Architect
Associate Professor of Practice

CONSTRUCTION OPPORTUNITIES

"The construction industry is a wonderful journey - it just takes imagination, dedication and the will to make it happen. The Texas State CSM Program is a great beginning to that journey."

Randall J. Pawelek, Former Chairman/CEO
Bartlett Cocke General Contractors

OUR VISION YOUR FUTURE

CONSTRUCTION ADVISORY BOARD

OUR MISSION

To be recognized as an innovative and creative Construction Advisory Board (CAB) supporting and advancing the construction program in a professional atmosphere at Texas State University.

Also, to be recognized as a professional organization that seeks input from students, faculty, administration and the construction industry, and encourages and empowers our construction graduates to seek a career in construction with pride and integrity as their core values.

“ EXPANDING PROGRAM

We are excited about the upward trajectory of the Texas State program and the opportunity that we have to be involved in its continuing development. The connection we have developed with the faculty and students of the Program are a direct result of the interactions that we have through our involvement in the Construction Advisory Board. We are proud of our Bobcats!

Cisco Hobbs, VP
Rogers-O-Brien Construction

BENEFITS OF MEMBERSHIP

- Enhancing the Construction Science Management Program
- Interacting with faculty members
- Providing the program with valuable input based on the needs of the construction industry
