

Using Zoom or Teams with Gen5

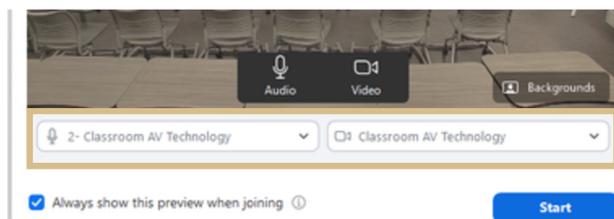

Zoom and Teams meetings can be used with Gen5 video conferencing technology. **Use the Room PC or a laptop via the USB-C connection** to have access to the room's camera(s) and microphone.

Important Note: If the Gen5 system in your room is a **Standard** version, you must **use the doc cam** for Zoom and Teams (camera and microphone).

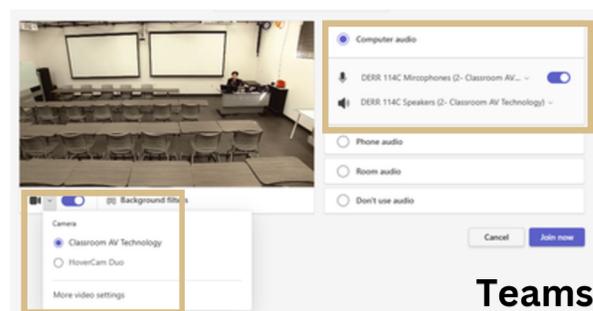

Camera selection and controls are on the Control Panel - not in Zoom or Teams.

Make sure that in Zoom or Teams, the camera and microphone selections are set to **Classroom AV Technology**.

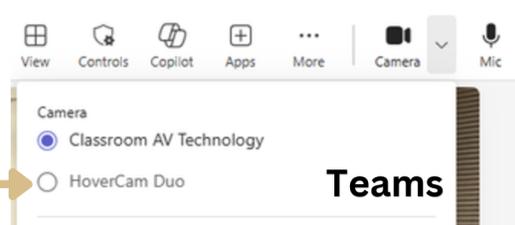

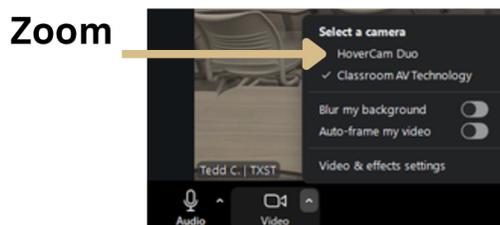

Zoom

Teams

If you want to **change the camera to the doc cam**, you will make that **change in Zoom or Teams**.

Teams
