Career Opportunities

Audio engineer

Audio technician

Sound designer

Sound mixer

Radio broadcast engineer

Digital audio editor

Instrument technician

Record producer

Recording studio manager

Music critic

Music analyst

Music educator

Music journalist

Experiences in Sound Recording Technology

The Sound Recording Technology (SRT) program is the only one of its kind in the Southwest. Sound recording technology majors study in a unique environment where creativity, knowledge, technical savvy, and real-world experience are combined to prepare graduates for a variety of potential employment opportunities. The cornerstone of this distinctive approach to education incorporates real-world experience in our commercial recording studios. These experiences are successfully combined with academic inquiry and the more traditional intellectual rigors associated with the pursuit of a baccalaureate degree. Students may participate in faculty-led study abroad or Study in America trips, learn with peers in Living and Learning Communities, develop a professional community at networking events, compete in student competitions, or join student organizations for a well-rounded experience.
