**OUTCOMES**

## Marketable Skills

Comprehensively assess and evaluate body size and body composition in apparently healthy adults and children.

Comprehensively assess and evaluate aerobic fitness in apparently healthy adults and children.

Comprehensively assess and evaluate muscular strength and endurance in apparently healthy adults and children.

Prescribe a safe and effective exercise program for improving health-related fitness and function in apparently healthy adults and children.

## Experiences in Health and Fitness Management

The bachelor of science major in health and fitness management prepares students to direct fitness, wellness or health awareness programs in commercial, corporate, and institutional settings. Strong research programs and labs, experiential learning, and community-engaged learning are incorporated into the program. Students may participate in faculty-led study abroad or Study in America trips, develop a professional community at association or networking events, or join student organizations for a well-rounded experience.
