

**Traffic loop and
two ADA parking spaces
closed intermittently
from October 22-23, 2026**

FPDC will perform geotechnical survey work at the main entrance of the Student Health Center on October 22-23, 2026 in advance of the planned Student Health Center expansion. During this work, crews will conduct geotechnical sampling within the designated survey area. As equipment moves around the site, localized temporary access restrictions will be necessary; however, pedestrian access will remain available into the building. Intermittent parking and traffic impacts may also occur near the work area. Please observe all safety personnel and temporary barricades in and around the work area.
